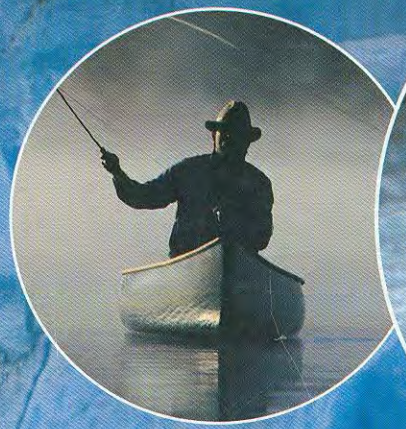
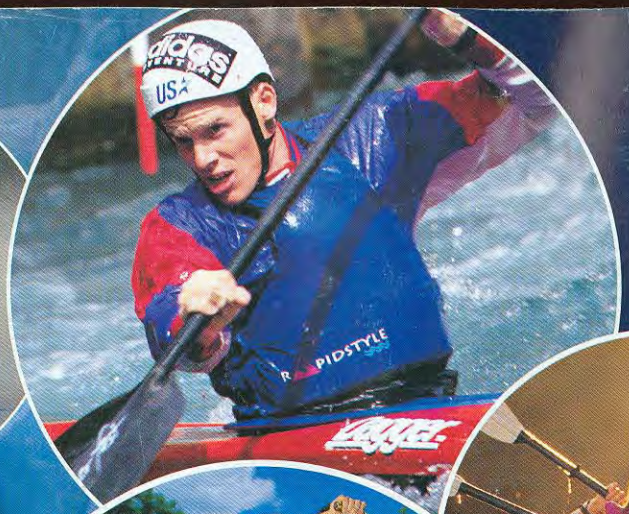
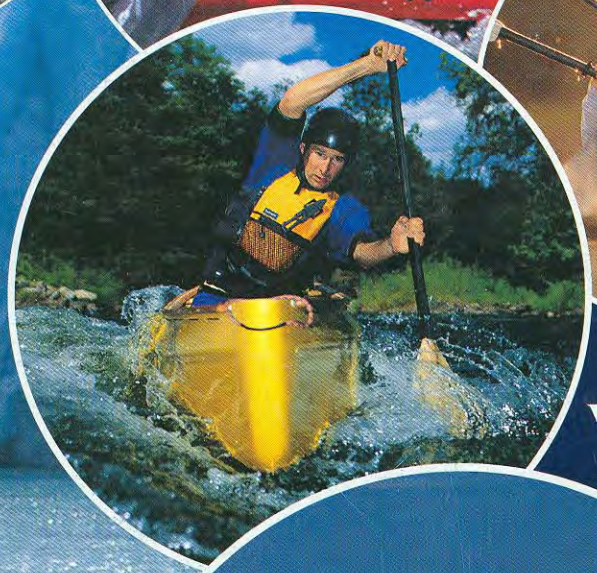
Dagger 1999







wherever there's water

Welcome To Dagger

Dagger kayaks are made from 100% recyclable plastic. If your Dagger kayak has seen better days, drop it by the factory and we'll make sure it gets ground up and recycled to live again. It may not be a Dagger kayak in its next life, but it could be a kayak seat, a toy, playground equipment, a trash can, or a plastic bin to hold your wet, smelly paddling gear. Call us for more information.

Top two photos at left: A few folks from Dagger and Team D took some time and shared their knowledge with some youngsters while on an R&D trip in Chile. Rumor has it Chile's populations of Sharks & Minnows hit a record high that day. - *Photos by Skip Brown*

Marc Lyle side-surfing in his "office." Almost endless tweaking and revision (and paddling) go into Marc's boats. Truly, a man obsessed! - *Photo by Dan Gavere*

One of the six Subarus Dagger's Team D Athletes used during the '98 paddling season. We are proud to be the Official Boat of Subaru, and are extremely happy to drive any Subaru as the Official Car of Dagger. - *Photo by Cindy Colella*

Dagger is honored to be the Official Supplier of the USCKT, as a way to support both athletes and paddlesports in general. Horace Holden, Jr. and Wayne Dickert take it to the hole. - *Photo by Brian Gomsak*

Welcome to Dagger's '99 Catalog!

As you read, you'll see we're extremely proud of our insight into boat design, but conceptual talent cannot replace hard work. No manufacturer produces as many new models per year as consistently as Dagger. Our first year, we introduced three new canoes. Eleven years later, we're introducing eleven new models in six different boat categories. This is only possible because our employees' love of paddling results in unflagging dedication to making the best boats anywhere.

Total Commitment to Paddling

As always, our success is due in part to keeping design in-house because when you control all phases of the process, your original vision gets that much closer to reality. We build our own prototypes, kayak plugs, canoe molds, ovens and more. As a testament to the quality of our work, we still use the original canoe oven built 11 years ago.

Many of our innovations are now the industry standard. Low volume ends with high volume mid-sections in whitewater playboats, for instance; Dagger was the first to begin radically resizing and reshaping hull forms. Today, any line of kayaks is incomplete without a creek boat, but the Freefall was the first. We first conceived of radically precise reinforcement for stronger, lighter Royalex™ sheets, and now many other canoe manufacturers have followed suit. This spirit of innovation continues even today. Flip through the following pages and note the philosophy of continual improvement in every boat from bow to stern.

Because we're also a company with a conscience, we do everything possible to ensure that our waterways are available to those that would paddle. We support organizations that protect the environment, give challenged kids access to paddling, or even fight those that would endanger paddling and all it encompasses. In fact, Dagger is the first manufacturer ever to receive the J. Henry Rushton Award from the American Canoe Association for the advancement of paddlesports and paddlesports issues. If you'd like information about paddlesport organizations, the back cover of this catalog has contact information.

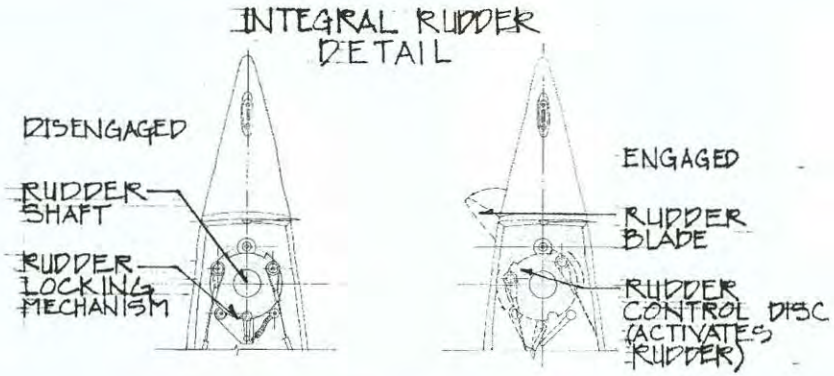
Some of the most spectacular sea kayaking is found on lakes, great or otherwise. Dominic Cloud just after rounding the corner to the lee side of an island on Lake Champlain.
- Photo by Brian Gomsak

Dagger's innovative spirit thrives in this category because we haven't been satisfied with boats that just float. We started with performance oriented hulls that maximize tracking ability and turning efficiency for added endurance on long paddles and precious maneuverability in tight situations. Our electronically welded bulkheads are unquestionably the best performing bulkheads available in plastic sea kayaks. They provide more energy conserving rigidity and form the most watertight seal of any plastic kayak bulkhead. Our tethered Sure-seal hatch covers are solid and easy to use with supple rubber that really grips the hatch rim for a superior seal. The patented Integral Rudder System on a number of our touring kayaks minimizes drag while still providing paddlers with substantial steering ability. No other manufacturer has come up with so many profound advancements year to year. We think you'll agree the list is impressive.

VACUUM ASSISTED RESIN TRANSFER MOLDING

VARTM

Dagger Composites utilizes the latest in vacuum molding technology and is the only kayak manufacturer to use VARTM. The VARTM process employs a true closed molding operation. While the fabric is placed in an outer mold, the inner mold is clamped in place and a special vinylester resin is injected under pressure into the mold. A full vacuum then pulls the resin directly through the fabric. VARTM produces a boat that is stronger and tougher with an average weight savings of 2-4 lbs. over conventional vacuum bagging. VARTM is used to produce the Sitka, Meridian SK and Latitude.



Sitka

SPECIFICATIONS		
Boat Length	17' 11"	5 m 37.5 cm
Boat Width	22"	56 cm
Weight (glass/kevlar™)	63/57 lbs	29/27 kg
Cockpit (lth. x wdth.)	31.5" X 16.5"	80 x 42 cm
Bow Hatch Volume	7392 cu in	121 l
Stern Hatch Volume	9702 cu in	159 l
Maximum load	320 lbs	144 kg
Material	glass, kevlar™	glass, kevlar™

COLORS: crimson, burnt orange, optic yellow, eggplant, electricblue, mint, glacier, ivory, combo-hull/deck

STANDARD FEATURES: Integral Rudder System, bow and stern access hatches, day hatch, KajakSport molded rubber hatch covers, fiberglass bow and stern bulkheads, anatomically designed seat, deluxe backband, neoprene padded thigh braces, adjustable Yakima foot braces with rudder control pedals, recessed deck fittings, deck lines and shock cord deck rigging, paddle float rescue rigging, recessed compass mount, under-deck water bottle, carrying toggles
OPTIONAL FEATURES: Kevlar™ or fiberglass layups

Sitka

The tour de force of our touring kayak line, the Sitka is an expedition proven kayak for those who require a dependable, responsive machine. The patented Integral Rudder System that is standard on the Sitka results in reduced drag and weight, increased durability, and cleaner lines. Extra-wide hatch openings with ample storage capacity and rubber hatch covers make easy work of packing and unpacking. With a contoured seat, padded thighbraces, under-deck water bottle holder, and easily accessible day hatch, the Sitka's comfort and ergonomic design is unparalleled. Fiberglass bulkheads and recessed deck fittings round out the boat that **SEA KAYAKER** says **"will meet a variety of paddling styles and will appeal to a wide range of boaters."**

Meridian SK

SPECIFICATIONS		
Boat Length	16'	4 m 88 cm
Boat Width	22"	56 cm
Weight (glass/kevlar™)	53/47 lbs	24/21 kg
Cockpit (lth. x wdth.)	31.5" X 16.5"	80 x 42 cm
Bow Hatch Volume	3696 cu in	61 l
Stern Hatch Volume	6237 cu in	102 l
Maximum load	280 lbs	127 kg
Material	glass, kevlar™	glass, kevlar™

COLORS: crimson, burnt orange, optic yellow, eggplant, electricblue, mint, glacier, ivory, combo-hull/deck

STANDARD FEATURES: Retractable skeg system, bow and stern access hatches, Kajak Sport molded rubber hatch covers, fiberglass bow and stern bulkheads, anatomically designed seat, deluxe backband, built-in neoprene padded thigh braces, adjustable Yakima foot braces, recessed deck fittings, deck lines and shock cord deck rigging, paddle float rescue rigging, recessed compass mount, under-deck water bottle, carrying toggles
OPTIONAL FEATURES: Day hatch with seam-taped hatch bag
*The Meridian is also available in a non-skeg version

Meridian SK

The Meridian SK is the most agile sea kayak in our stable. First there was the Meridian without a skeg which is still available for you essentialists; then came the Meridian SK with a cockpit controllable retractable skeg. The funhog of sea kayaks, paddlers continue to be amazed by the Meridian's turning ability and responsiveness without a sacrifice in hull speed or tracking. Its unique performance is born from the pronounced vee at the bow and stern ends with a shallow arch midship. This new twist on the classic West Greenland design provides an ultra-smooth ride, even in the big chop, and the easily accessible hatches provide enough storage for multi-day tripping. Beautiful lines, top quality materials and lay-up, plus Dagger's trademark attention to detail sum up one of the lightest, stiffest touring kayaks of its kind.

Latitude

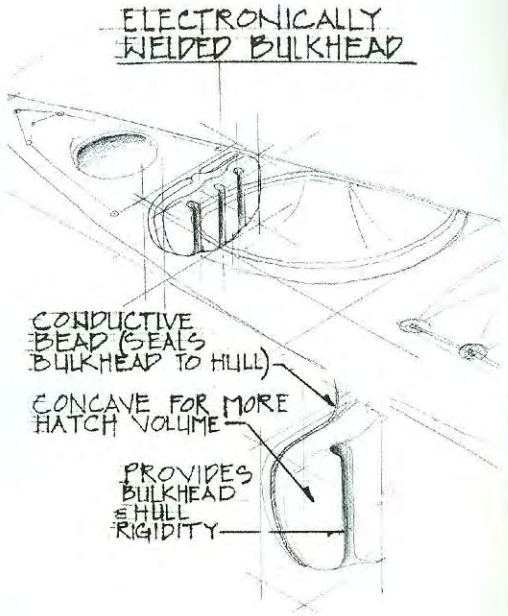
SPECIFICATIONS		
Boat Length	17' 4"	5 m 28 cm
Boat Width	21.5"	55 cm
Weight (glass/kevlar™)	55/51 lbs	25/23 kg
Cockpit (lth. x wdth.)	31.5" X 16.5"	80 x 42 cm
Bow Hatch Volume	5100 cu in	83 l
Stern Hatch Volume	9000 cu in	147 l
Maximum load	300 lbs	136 kg
Material	glass, kevlar™	glass, kevlar™

COLORS: crimson, burnt orange, optic yellow, eggplant, electricblue, mint, glacier, ivory, combo-hull/deck

STANDARD FEATURES: Integral Rudder System, Bow and stern access hatches, Kajak Sport molded rubber hatch covers, fiberglass bow and stern bulkheads, anatomically designed seat, deluxe backband, built-in neoprene padded thigh braces, Yakima footbraces with rudder control pedals, recessed deck fittings, deck lines and shock cord deck rigging, paddle float rescue rigging, recessed compass mount, under-deck water bottle, carrying toggles
OPTIONAL FEATURES: Day hatch with seam-taped hatch bag

Latitude

Filling the gap between the nimble Meridian and the expedition Sitka, the Latitude continues Dagger's proud composite touring history. For day touring or extended tripping the Latitude will fill the needs of paddlers who want a faster composite kayak without sacrificing a tremendous amount of maneuverability. Details like canted fiberglass bulkheads give you more cargo capacity and the bow and stern rubber hatch covers are tight and worry-free. The Integral Rudder System you've seen on other Dagger touring kayaks is standard equipment on the Latitude, providing reliable turning assistance in a low-drag rudder.



Baja

The Baja, a polyethylene expedition-ready sea kayak, is the smaller version of our Atlantis (see below). Developed for the small to mid-sized paddler, the Baja's scaled-down seat and reduced cockpit volume translate into a better fit for those paddlers who find most of today's cockpits too loose. And you can always install a set of whitewater thighbraces for better performance and comfort. It comes fully equipped with bow and stern tethered Sure-seal rubber hatch covers, Dagger's electronically welded bulkheads and the patented Integral Rudder System. Beginners to experts will find this touring kayak responsive and fast.

Baja

SPECIFICATIONS

Boat Length	15' 6"	4 m 72 cm
Boat Width	22.5"	57 cm
Weight	51 lbs	23 kg
Cockpit* (lth. x wdth.)	34" x 19"	86 x 48 cm
Bow Hatch Volume	2000 cu in	33 l
Stern Hatch Volume	6500 cu in	106 l
Maximum load	265 lbs	120 kg
Material	EXL™	EXL™

COLORS: mango, kiwi, red, yellow, purple, blue, teal, white, black

STANDARD FEATURES: Integral Rudder System, bow and stern access hatches with one piece Sure-seal molded rubber hatch covers, electronically welded plastic bulkheads, recessed deck fittings, deck lines and shock cord deck rigging, paddle float rescue rigging, security bar, seat with adjustable backrest, padded seat and backrest cover, adjustable foot braces with rudder control pedals, neoprene thigh pads, carrying toggles, molded-in graphics

* Also compatible with Dagger's Less-aggressive thighbraces for enhanced performance and a custom fit.

Atlantis

Highlighted by the patented Integral Rudder System, the expedition-ready Atlantis has the largest carrying capacity of all our polyethylene boats. This sea kayak satisfies the needs of touring paddlers who require more cargo space and a larger, roomier cockpit. The long waterline makes the Atlantis one of the hardest tracking boats on the market while retaining stability, even in the roughest of open water crossings. Beginners will find the Atlantis's forgiving nature a comfort as sliced strokes and wobbly leans are easily corrected. Top all this off with two electronically welded bulkheads, one-piece thighbraces, molded rubber hatch covers and beautiful lines to complete the total touring package...all standard.

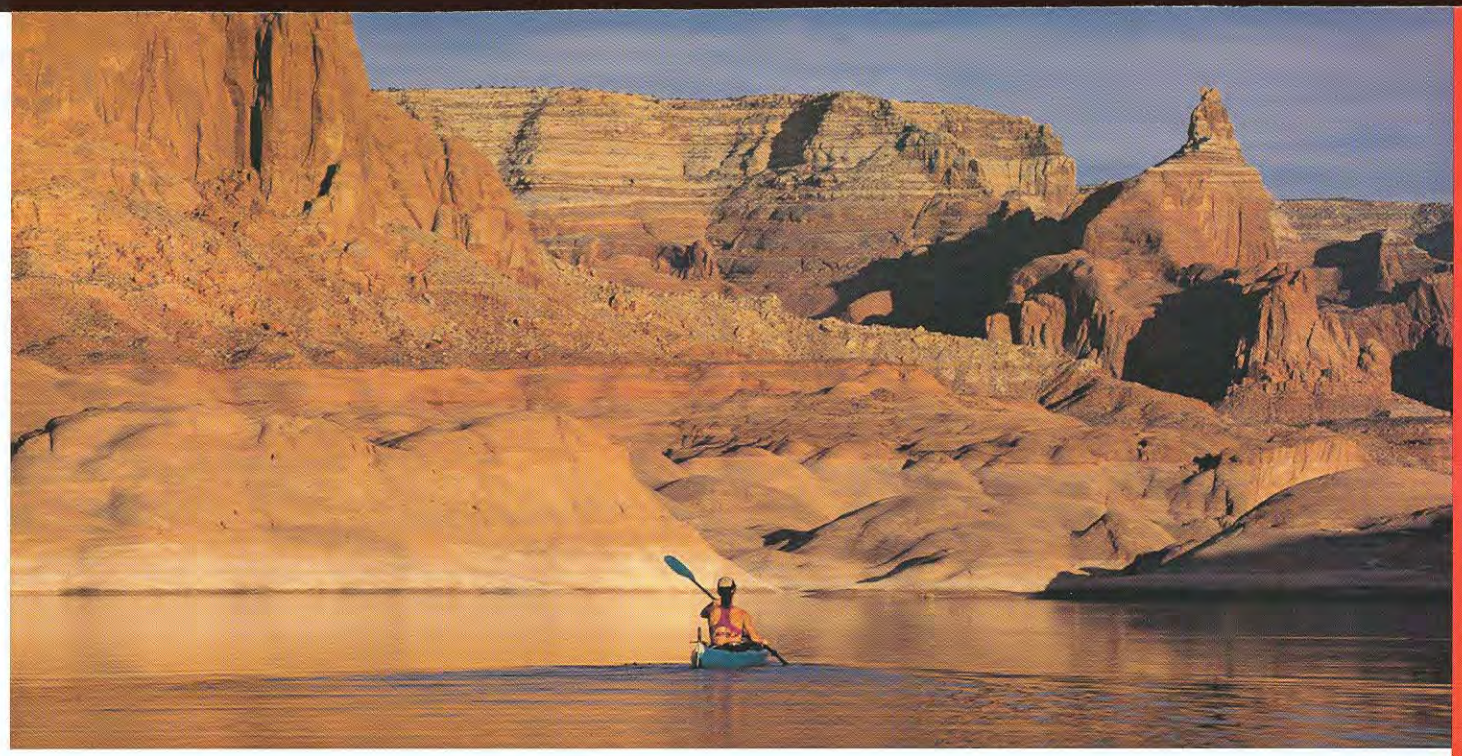
Atlantis

SPECIFICATIONS

Boat Length	17' 2"	5 m 23 cm
Boat Width	23.5"	59.4 cm
Weight	69 lbs	31.5 kg
Cockpit (lth. x wdth.)	34" x 19"	86 x 48 cm
Bow Hatch Volume	4500 cu in	74 l
Stern Hatch Volume	8400 cu in	138 l
Maximum load	335 lbs	152.8 kg
Material	EXL™	EXL™

COLORS: mango, kiwi, red, yellow, purple, blue, teal, white, black

STANDARD FEATURES: Integral Rudder System, bow and stern access hatches with one piece Sure-seal molded rubber hatch covers, electronically welded plastic bulkheads, recessed deck fittings, deck lines and shock cord deck rigging, paddle float rescue rigging, security bar, seat with adjustable backrest, padded seat and backrest cover, adjustable foot braces with rudder control pedals, padded neoprene thigh braces, carrying toggles, molded-in graphics



Andrea Goldberger, also an avid climber, cross-trains on Lake Powell in Utah. The scenery is extra! The lake, which covers about 250 square miles, runs through the heart of the Glen Canyon National Recreation Area.

Magellan

SPECIFICATIONS			
Boat Length	16' 6"	4 m 92 cm	
Boat Width	22.5"	57.2 cm	
Weight	62 lbs	28 kg	
Cockpit* (lth. x wdth.)	34" x 19"	86 x 48 cm	
Bow Hatch Volume	4200 cu in	69 l	
Stern Hatch Volume	7200 cu in	118 l	
Maximum load	315 lbs	142.9 kg	
Material	EXL™	EXL™	

COLORS: mango, kiwi, red, yellow, purple, blue, teal, white, black

STANDARD FEATURES: Bow and stern access hatches with one-piece Sure-seal molded rubber hatch covers, electronically welded plastic bulkheads, recessed deck fittings, deck lines and shock cord deck rigging, paddle float rescue rigging, seat with adjustable backrest, padded seat and backrest cover, neoprene thigh pads, adjustable foot braces, carrying toggles, molded-in graphics
OPTIONAL FEATURES: Retractable rudder

* Also compatible with Dagger's Less-aggressive thighbraces for enhanced performance and a custom fit.

Edisto

SPECIFICATIONS			
Boat Length	14' 6"	4 m 42 cm	
Boat Width	24.5"	62 cm	
Weight	49 lbs	22 kg	
Cockpit* (lth. x wdth.)	34" x 19"	86 x 48 cm	
Bow Hatch Volume	N/A	N/A	
Stern Hatch Volume	6800 cu in	111 l	
Maximum load	300 lbs	136 kg	
Material	EXL™	EXL™	

COLORS: mango, kiwi, red, yellow, purple, blue, teal, white, black

STANDARD FEATURES: Stern access hatch with one-piece Sure-seal molded rubber hatch cover, bow day hatch, bow and stern flotation, recessed deck fittings, deck lines and shock cord deck rigging, seat with adjustable backrest, adjustable foot braces, carrying toggles, molded-in graphics
EXPEDITION VERSION: Electronically welded plastic bulkhead, padded seat and backrest cover, paddle float rescue rigging, neoprene thigh padding
OPTIONAL FEATURES: Retractable rudder

* Also compatible with Dagger's Less-aggressive thighbraces for enhanced performance and a custom fit.

Magellan

The Magellan is a mid-sized sea kayak designed to fill the niche between the expedition style Atlantis and shorter boats like the Seeker. Fast and comfortable, the Magellan is for the majority of touring paddlers out there who spend their paddling time on day trips or extended weekend jaunts. Although more stable, its hull form is akin to the Meridian with a pronounced vee bow and classic lines. It tracks extremely well but turns like a much shorter boat, carving and surfing with ease, responding to even moderate leans. The Magellan's recessed, injection molded deck fittings, shock cord bow carry toggle, and electronically welded bulkheads are emblematic of Dagger's commitment to original, value-added details.

Edisto

The Edisto is our most versatile and best selling touring kayak. Its stable, user-friendly design makes it perfect for paddlers of all levels who want a compact touring kayak with the feel of a longer craft. With a shorter length to enhance maneuverability, the Edisto handles rivers as well as small tidal creeks, marshes, swamps, and coves where close encounters with nature require stealthy movement. Well suited for lake touring, the Edisto's stern hatch volume of 6800 cubic inches, roomy cockpit, and carrying capacity of 300 lbs. make it the ideal weekend warrior touring machine.

Seeker

The Seeker is a mid-sized touring kayak designed for those paddlers who want a fast boat with more storage capacity than the Vesper or Edisto, but still don't need a full blown expedition craft. An ideal first boat with plenty of growing room, the Seeker delivers a fine balance of stability and swiftness with a low profile designed to resist the weathercocking tendencies of many boats in this size range. This same low profile design plus the molded-in thigh braces make the Seeker a great fit for smaller adult paddlers and kids. Reviewers in SEA KAYAKER say "the Seeker felt very stable on the water. It was easy to balance while on edge and would 'fall back upright as opposed to over.'" Available in standard or expedition versions with utility at its heart, the Seeker redefines touring kayak performance.

Vesper

Designed with enough cargo space for day tripping and light overnight camping, the Vesper was our first touring kayak and continues to perform year after year. This consummate day tripper, with its short length and stable hull design, is a great choice for those of you who paddle in a wide variety of situations. Being the most maneuverable and lightest touring kayak in our line, the Vesper is perfect for kids and smaller adults, making it an excellent multi-use family boat that everyone can paddle. The Vesper's stern access hatch, deck rigging and optional skeg, rudder, and expedition package make it a fantastic value in a touring kayak.

Ah, the good life! Camping after a long day's paddle is one of life's true pleasures. Dominic Cloud unpacks in an alcove on Lake Champlain. - *Photo by Brian Gomsak*

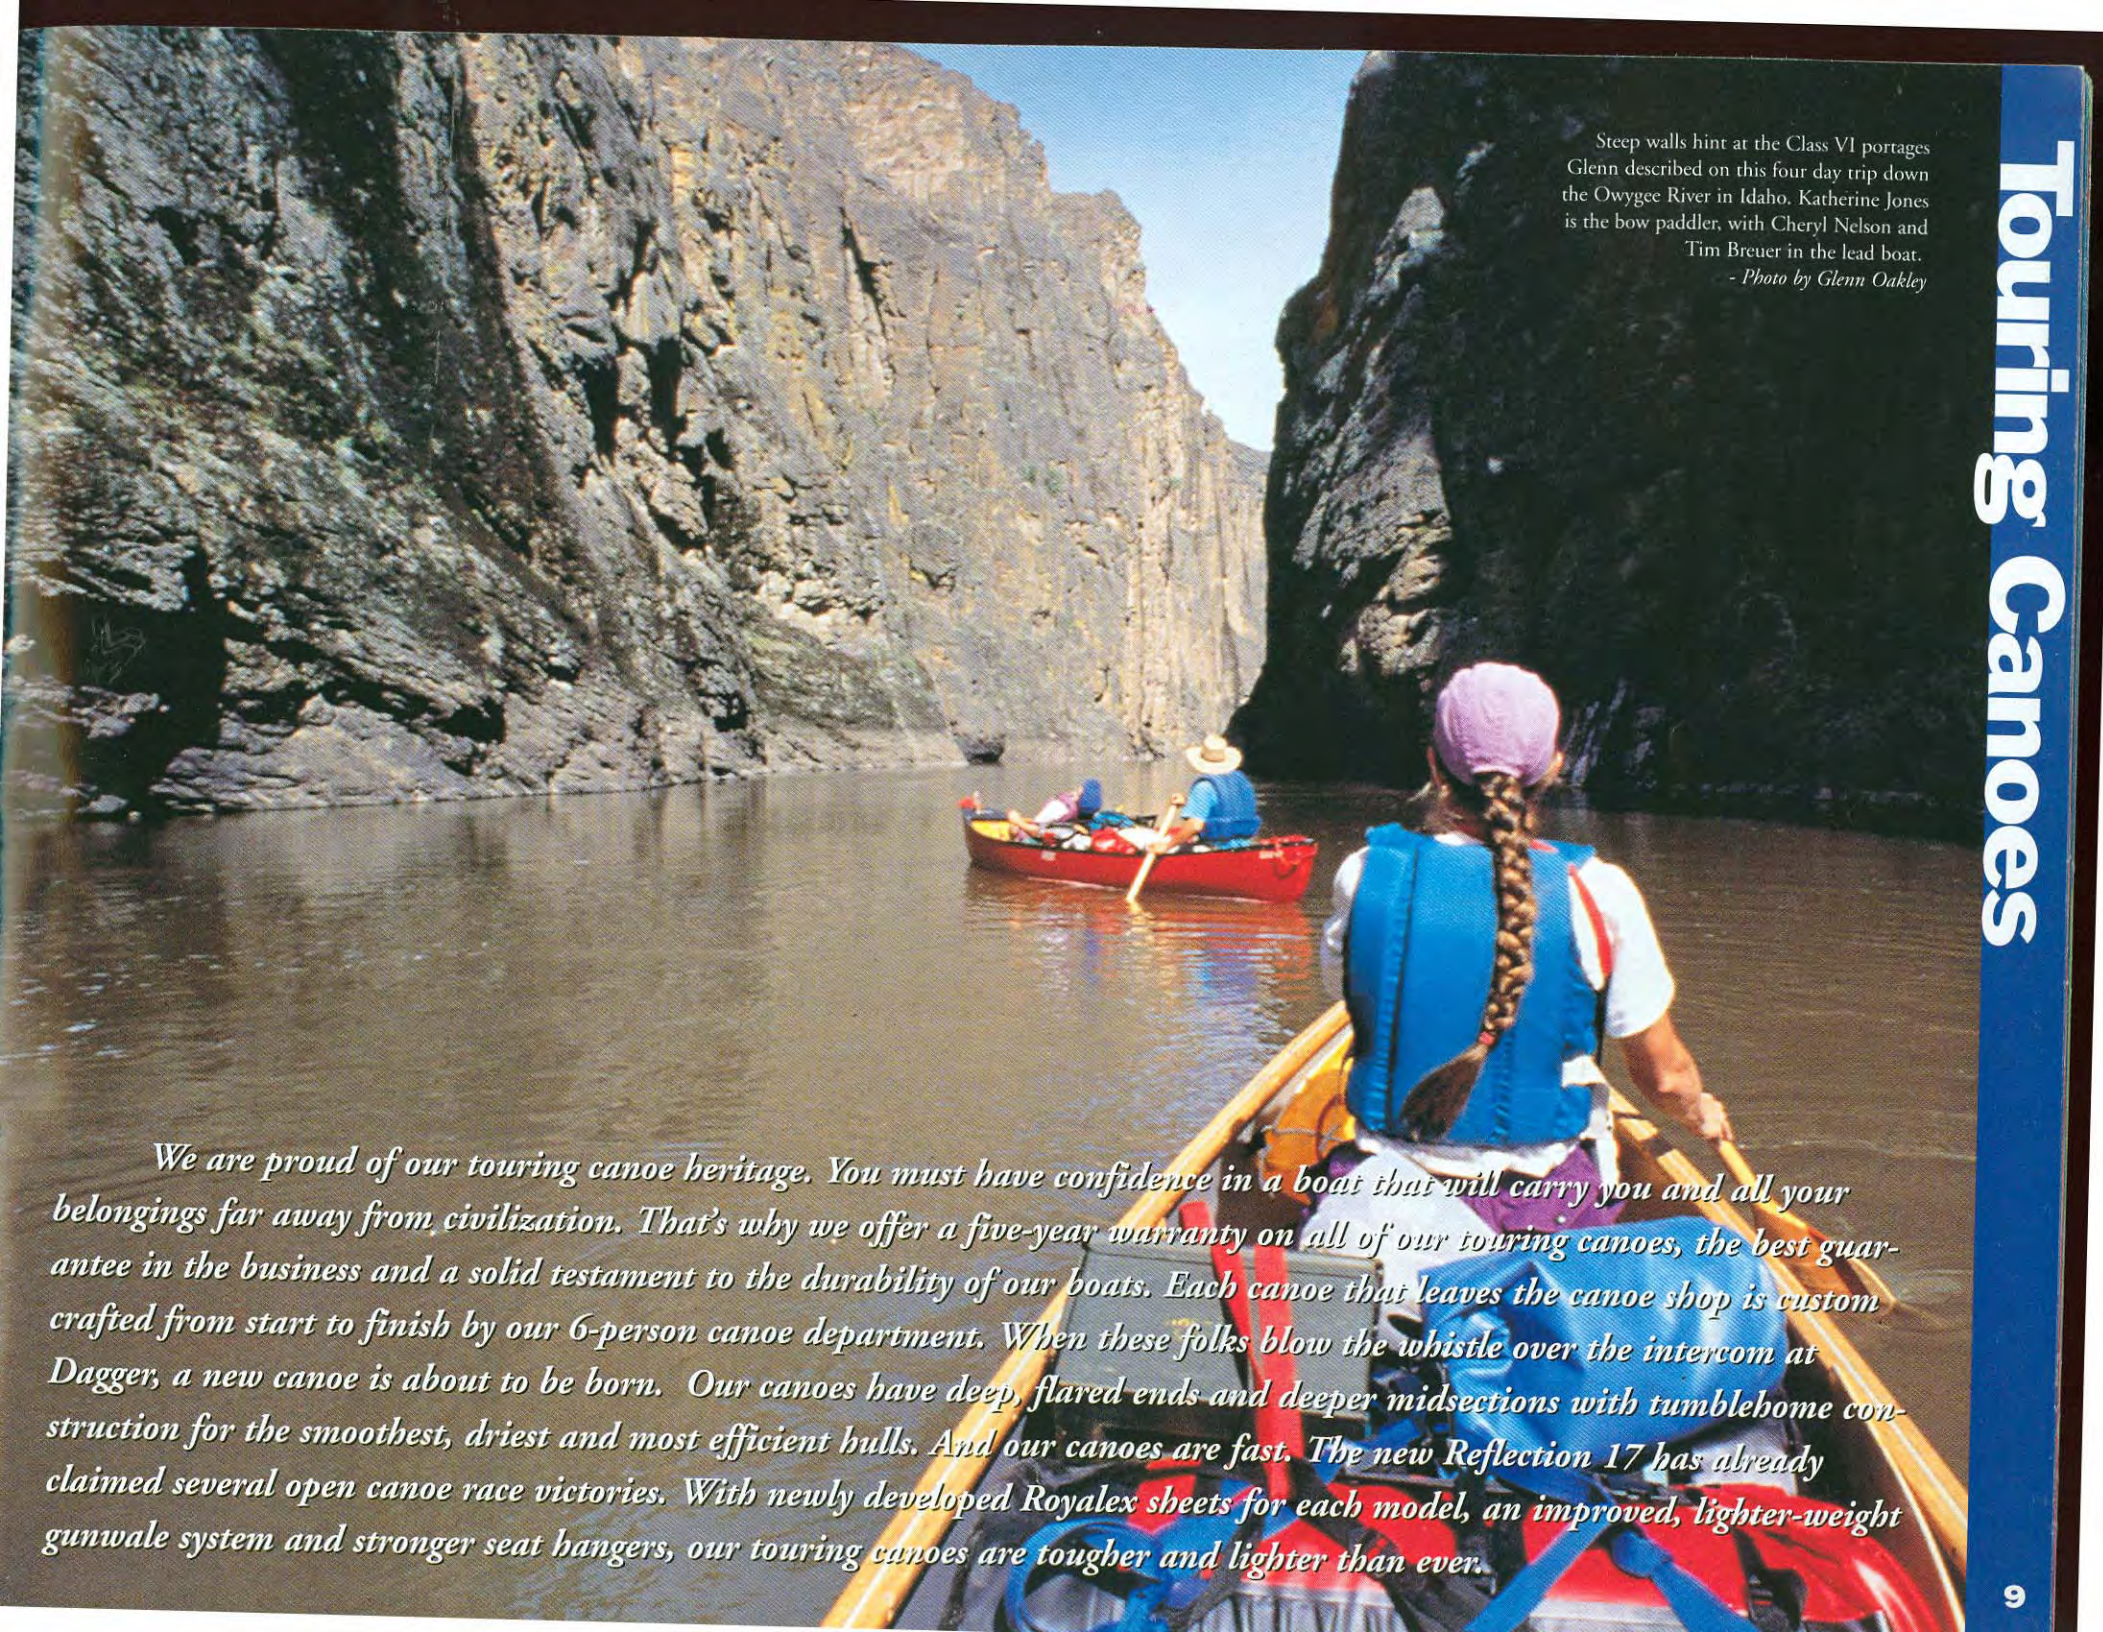
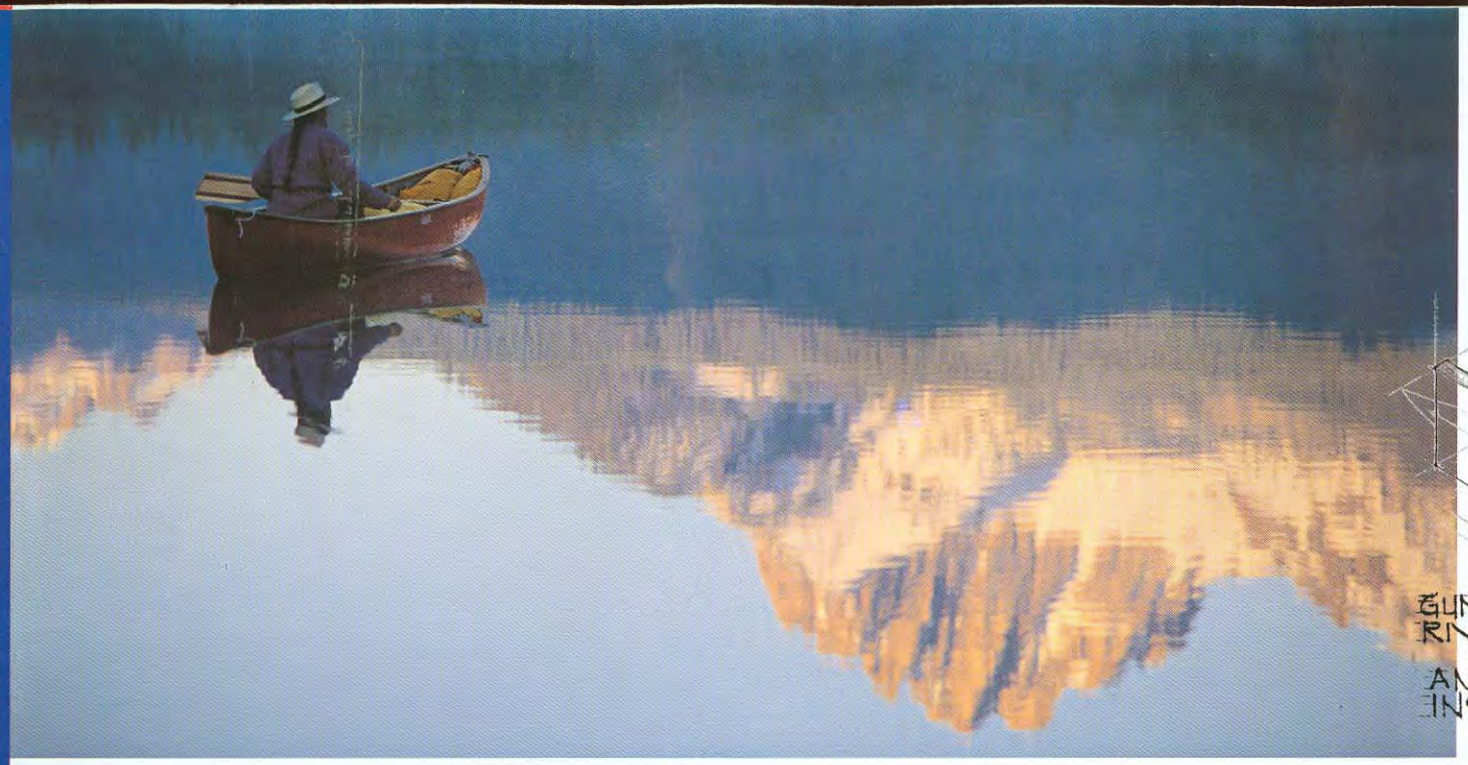
Touring Canoes

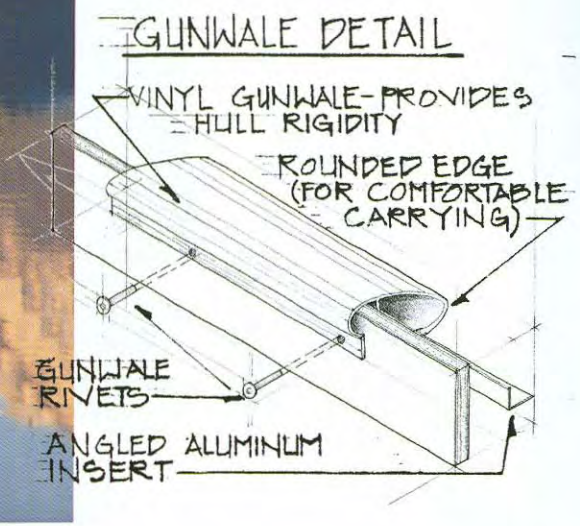


Steep walls hint at the Class VI portages Glenn described on this four day trip down the Owygee River in Idaho. Katherine Jones is the bow paddler, with Cheryl Nelson and Tim Breuer in the lead boat.
- Photo by Glenn Oakley

We are proud of our touring canoe heritage. You must have confidence in a boat that will carry you and all your belongings far away from civilization. That's why we offer a five-year warranty on all of our touring canoes, the best guarantee in the business and a solid testament to the durability of our boats. Each canoe that leaves the canoe shop is custom crafted from start to finish by our 6-person canoe department. When these folks blow the whistle over the intercom at Dagger, a new canoe is about to be born. Our canoes have deep, flared ends and deeper midsections with tumblehome construction for the smoothest, driest and most efficient hulls. And our canoes are fast. The new Reflection 17 has already claimed several open canoe race victories. With newly developed Royalex sheets for each model, an improved, lighter-weight gunwale system and stronger seat hangers, our touring canoes are tougher and lighter than ever.



Katherine Jones gets out on Little Redfish Lake early enough to watch the mist burn off and reveal the Sawtooth Mountains in Idaho.
- Photo by Glenn Oakley



Sojourn

The Sojourn is our incredibly fast Royalex solo touring canoe. Canoe expert and author Cliff Jacobson comments that the Sojourn has "the look of a Porsche speedster--subdued elegance in an integrated package that was born to run." Easily reaching cruising speed, the Sojourn is hard tracking and handles those heavy lake winds. The slightly flared ends keep you dry in choppy water and the tumblehome allows efficient, easy paddle strokes. With the slider seat you can adjust the trim for loads, different paddlers and paddling styles, plus the secondary stability lets you lean comfortably into turns for maximum efficiency. Top this off with a lightweight Royalex layup and you have a perfect afternoon workout canoe and solo tripper.

Venture 17

Capable of handling everything from family weekends to an extended expedition, the Venture 17, our largest canoe, is a truly versatile boat. Loaded or unloaded, its tracking and stability are uncompromised. **CANOE AND KAYAK** says that **"The big-hulled Venture carries a tremendous load without compromising its handling capabilities or giving up freeboard...[Its] sharp entry and shallow arch hull make it one of the fastest big-volume Royalex boats..."** Its asymmetrical hull design and slightly flared ends result in a smooth, dry ride, and with a huge load capacity, the Venture 17 will handle anything you throw in it.

Sojourn

SPECIFICATIONS		
Boat Length	14' 9"	4 m 50 cm

* For volume comparison only. Actual safe capacity depends on factors such as water conditions and paddler skills.

Guaranteed smiles. The Reflection 15 is the favorite touring canoe of many of the folks here at Dagger, striking the perfect balance between a canoe that excels on rivers yet scoots right along when you're on flatwater. Designed to be paddled tandem or solo, the Reflection 15 is so much fun in so many places. It's the perfect canoe for those desiring a smaller, easy to handle boat. The Reflection 15 is stable enough to nurture confidence in the current and hold the line against gusty lake winds. With asymmetrical hull and just the right amount of rocker, the boat cuts through the water and turns with ease, all the time weighing less than sixty pounds.

Reflection 16

SPECIFICATIONS			
Boat Length	16' 4"	4 m 98 cm	
Beam (max./4" water line)	35"/33"	89/84 cm	
Depth (ends/mid-ship)	17"/14"	43/35.5 cm

OPTIONAL FEATURES: Webbed seats, center seat, bow slider seat, wood trim (Northern Ash gunwales and Tennessee Cherry hardwood deckplates)

* For volume comparison only. Actual safe capacity depends on factors such as water conditions and paddler skills.

One of the most versatile and stable boats Dagger makes, the Reflection 16 performs extremely well in a surprisingly wide variety of conditions. It will track like a champ on a windy day at the lake, and yet with a slight lean it turns and catches river eddies with the best of them. With its noticeably lighter weight and center seat option, the Reflection 16 can satisfy an entire family's needs. With plenty of carrying capacity, you can bring everyone and their gear, and still have confidence in the optimal performance of your canoe.

Reflection 17

SPECIFICATIONS			
Boat Length	17' 4"	5 m 28 cm

STANDARD FEATURES: Aluminum gunwales and polyethylene deckplates, portage yoke with yoke pad, underseat waterbottle holder and bottle
OPTIONAL FEATURES: Fixed hanging bow seat, webbed seats, wood trim (Northern Ash gunwales and Tennessee Cherry hardwood deckplates)

* For volume comparison only. Actual safe capacity depends on factors such as water conditions and paddler skills.

In keeping with the other boats in the Reflection series, the new Reflection 17 encompasses versatility, performance and ease of use. It is also the best tracking, roomiest and fastest of the series. It has even been known to race against and beat composite canoes in flatwater competition. With its high load capacity the Reflection 17 is perfect for families and long distance trippers who need an efficient, lightweight canoe with an abundance of room.

Suwannee

Dagger design team leader Steve Scarborough says "The Suwannee is the most stable canoe I've ever designed, making it ideal for families and sport use." Roomy and predictable, the Suwannee is an excellent fishing and recreational canoe that paddles easily and turns efficiently. The midship tumblehome minimizes the boat width, making for smooth paddle strokes. With plenty of cargo capacity, the Suwannee can handle weekend tripping while retaining its stability and performance. Made from a precision reinforced Royalex layup and outfitted standard with cane seats and a portage yoke, the Suwannee is lightweight and ready to paddle.

Legend 15

A complement to the ever-popular Legend 16, the Legend 15 offers the same strength and longevity as the traditional 16' model. A true crossover boat, the Legend 15 is at home in whitewater or flatwater, paddled solo or tandem. The symmetrical hull is designed with a special seat arrangement and midship tumblehome so a person can sit in the bow seat "backwards" for easy solo paddling. If you're going to buy one canoe to do it all, this is the one.

Legend 16

Aptly named, the Legend has developed quite a following over the years. We'd guess most of the Legends we first built over a decade ago are still being used and abused by people from all over. The Legend is constructed of precision reinforced Royalex, so you get the strongest canoe possible. For big, fast currents, loaded or unloaded, for the day or for three weeks, the Legend has no equal. First time paddlers of this canoe are consistently surprised by its stability, maneuverability, and ease of paddling.

Jennie Spiker catches the sunrise on St. Mary's Lake in Glacier National Park, Montana.
- Photo by Scott Spiker

We introduced this line last year, and the only thing we can say is we can't seem to make them fast enough. These are recreational kayaks that let people paddle the first time they sit in a boat, but they are also kayaks that incorporate high performance characteristics from other boat categories that smooth out choppy water and cheat the wind on a lake. We've fused our penchant for extras into this line, with a sliding bow seat for trim adjustment on the Bayou 2, and the beefy rubber hatch cover with a bulkhead option on the Delta. Padded seats, drink holders, security bars, and deck rigging are rounded out by stronger, lighter skin-foam construction using the most advanced methods in the business.

Bayou

SPECIFICATIONS			
Boat Length	10' 8"	3 m 25 cm	
Boat Width	28"	71.1 cm	
Weight	40 lbs	18 kg	
Cockpit (lth. x wdth.)	36" x 21"	91 x 53 cm	
Paddler Wt. Range	< 250 lbs	< 113.4 kg	
Material	EXL™/Skin-foam	EXL™/Skin-foam	

COLORS: mango, kiwi, red, yellow, purple, blue, teal, white, black

STANDARD FEATURES: Seat with adjustable backrest and beverage holder, padded seat and backrest cover, footbraces, recessed deck fittings, shock cord deck rigging, brass security bar with irreversible screws, carrying toggles, molded-in graphics

OPTIONAL FEATURE: Camouflage pattern

Bayou

With a non-confining, open cockpit configuration and a roomy interior, the Bayou's stable, easy to paddle design is surprisingly fast and sure tracking for a recreational boat. Available in camo, the Bayou is excellent for outdoor pursuits where a quiet approach is required. Our unique skin foam construction makes the Bayou lightweight and strong. Clean lines, classic Dagger styling, and features like the security bar, recessed deck fittings, and adjustable footbraces place this kayak in the next generation of recreational boats.

Delta

SPECIFICATIONS			
Boat Length	12'	3 m 66 cm	
Boat Width	28.5"	71.1 cm	
Weight	50 lbs	23 kg	
Cockpit (lth. x wdth.)	48" x 21"	121 x 53 cm	
Paddler Wt. Range	< 280 lbs	< 127 kg	
Material	EXL™/Skin-foam	EXL™/Skin-foam	

COLORS: mango, kiwi, red, yellow, purple, blue, teal, white, black

STANDARD FEATURES: Seat with adjustable backrest and beverage holder, padded seat and backrest cover, footbraces, stern access hatch with one-piece Sure-seal molded rubber hatch cover, recessed deck fittings, shock cord deck rigging, brass security bar with irreversible screws, carrying toggles, molded-in graphics

EXPEDITION VERSION: Silicone-sealed minicell stern bulkhead

OPTIONAL FEATURES: Camouflage pattern

Delta

The new addition to our popular recreational series, the Delta is a super-roomy, full-featured sporting kayak. With an extra-long cockpit and standard stern hatch for easy access, the Delta has plenty of room for you and your gear. And to keep your gear dry, check out the expedition version that includes a silicone sealed minicell bulkhead. Very versatile, very stable, the Delta is the next step in recreational kayaks--perfect for extended daytrips, birding, and fishing when you like to bring plenty of gear.

Bayou 2

SPECIFICATIONS			
Boat Length	13' 6"	4 m 11 cm	
Boat Width	30"	76.2 cm	
Weight	60 lbs	27 kg	
Cockpit (lth. x wdth.)	80" x 21"	203 x 53cm	
Paddler(s) Wt. Range	< 450 lbs	< 204 kg	
Material	EXL™/Skin-foam	EXL™/Skin-foam	

COLORS: mango, kiwi, red, yellow, purple, blue, teal, white, black

STANDARD FEATURES: Seats with adjustable backrest and beverage holder, sliding bow seat, adjustable seat lock, padded seats and backrest covers, footbraces, recessed deck fittings, shock cord deck rigging, brass security bar with irreversible screws, carrying toggles, molded-in graphics

OPTIONAL FEATURE: Camouflage pattern

Bayou 2

A one or two person version of the Bayou, the Bayou 2 offers the same styling, performance, and unique features as its companion. Our skin foam construction produces a recreational kayak that is stiffer and lighter in weight than you would expect out of a 13'6" plastic boat. Due to the wide open cockpit, incredible stability and spacious interior, paddlers will find ease of movement a definite advantage. Striking out on a solo trip is not a problem in the Bayou 2; the sliding bow seat allows you to adjust the trim of the kayak and easily convert the seat to a solo position.

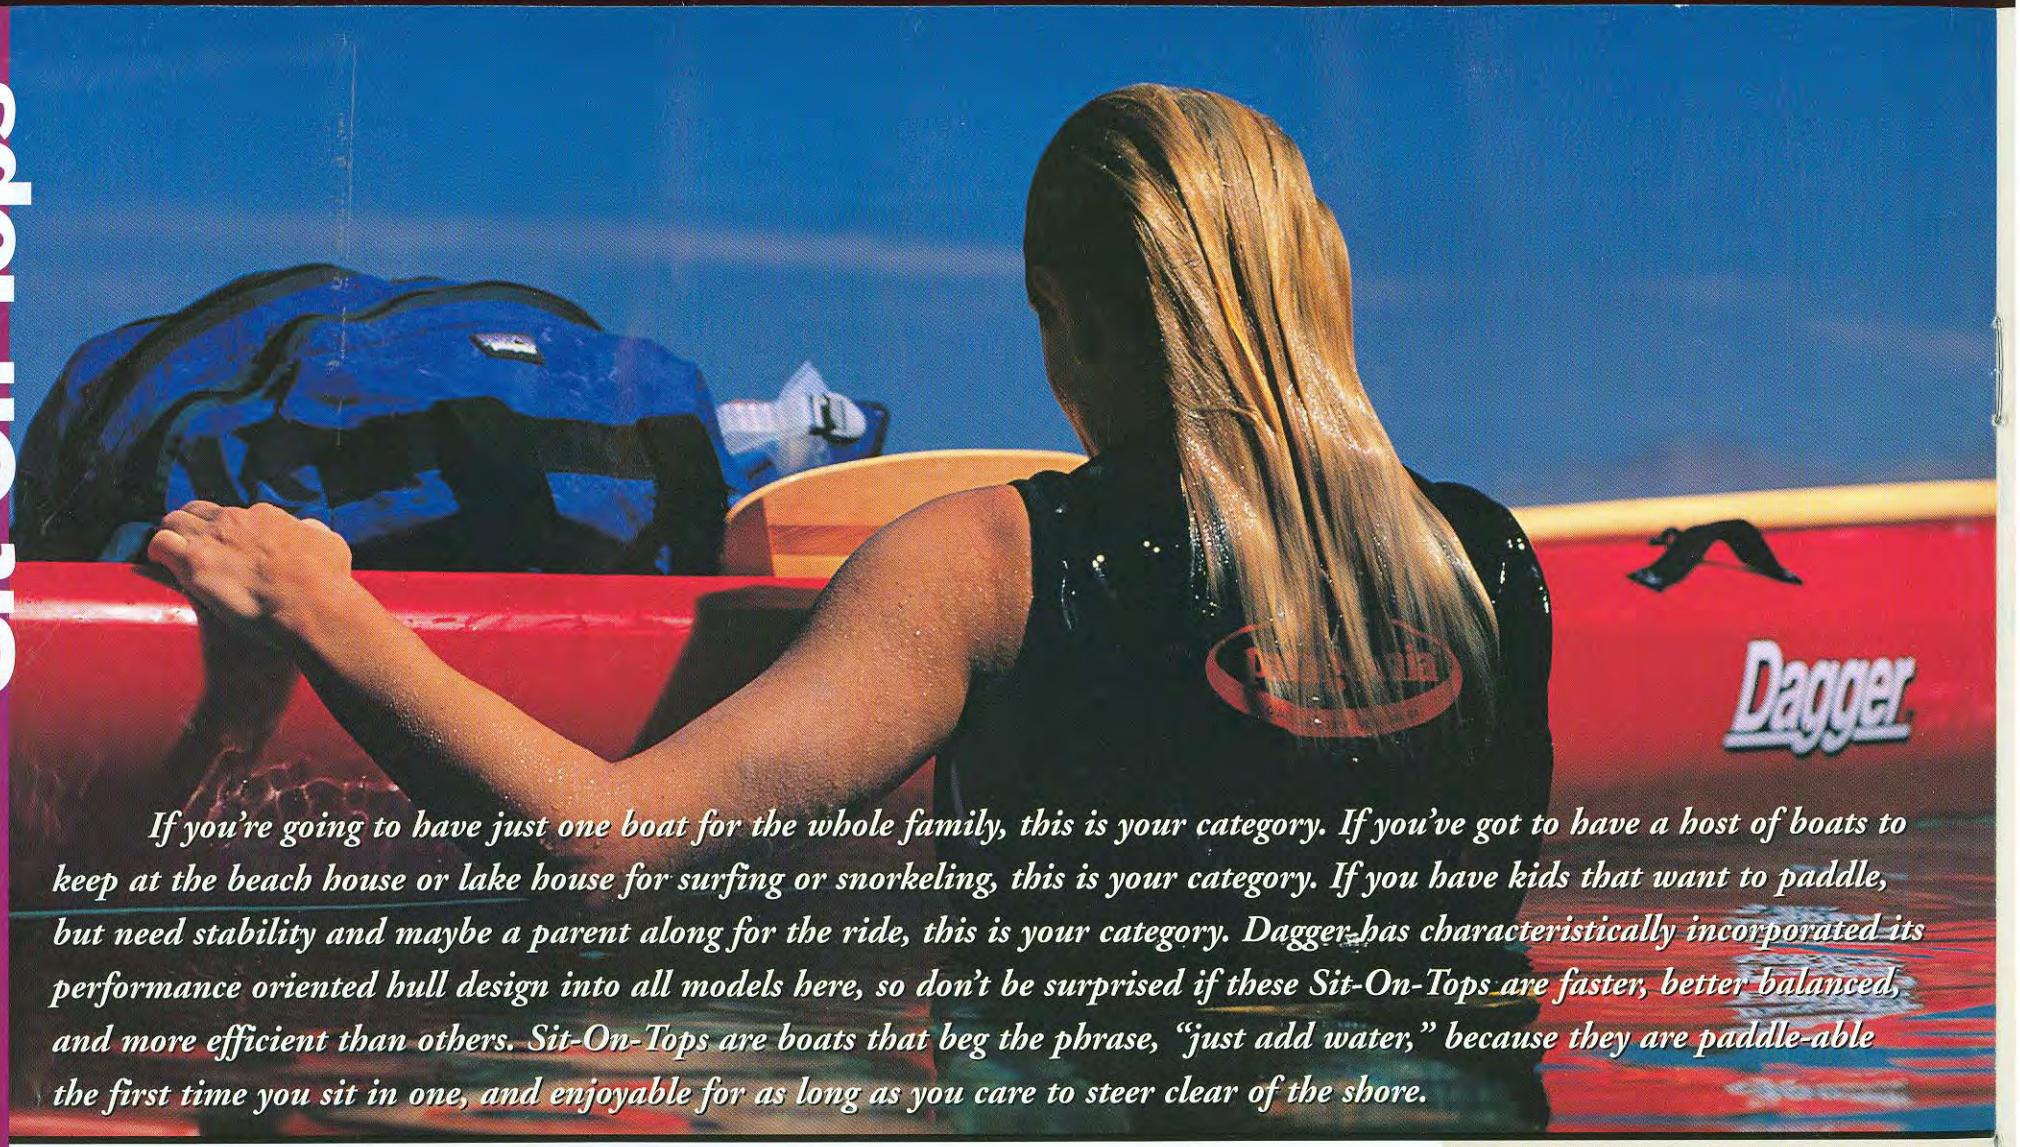
★ GREAT! ● GOOD ◒ OK ○ NOT SUITABLE



If you're going to have just one boat for the whole family, this is your category. If you've got to have a host of boats to keep at the beach house or lake house for surfing or snorkeling, this is your category. If you have kids that want to paddle, but need stability and maybe a parent along for the ride, this is your category. Dagger has characteristically incorporated its performance oriented hull design into all models here, so don't be surprised if these Sit-On-Tops are faster, better balanced, and more efficient than others. Sit-On-Tops are boats that beg the phrase, "just add water," because they are paddle-able the first time you sit in one, and enjoyable for as long as you care to steer clear of the shore.

Pegasus

Our whitewater sit-on-top, the Pegasus has refined performance, striking a balance between tracking and turning that will comfort novice paddlers and surprise accomplished boaters. PADDLER magazine reviewers say, "The Pegasus hull has enough rocker to give excellent turning response and quick, crisp maneuverability. The boat surfs easily and smoothly, with plenty of volume up front to keep the bow from burying deeply..." With its narrowed hull, paddle reach is lessened, making for easier strokes compared to many other sit-on-tops on the market. Combine these features with padded thigh straps and QuickTrak™ footbraces for a more comfortable and secure leg position.

Pegasus

SPECIFICATIONS

Boat Length	10' 6"	3 m 20 cm
Boat Width	29"	73.7 cm
Weight	52 lbs	23 kg

Material	EXL™	EXL™	blue
			teal
			white
			black

STANDARD FEATURES: Day hatch, quick draining self-bailing scuppers, recessed deck loops and seat accessory loops, recessed bow and stern storage area with gear straps, drain plug, solo side carry handles, Easy Grip carry toggles, molded-in graphics

Frolic

Just add water. The Frolic's simplicity and ultra-stable hull design translate into a boat that anyone can paddle. Well suited for everything from flatwater to ocean surf, the Frolic is great for those hot summer days on the lake or catching the ideal wave at the beach. With a custom scuba tank recess in the stern storage area, storage straps, and enough capacity for a long day out, the Frolic is just the boat for diving excursions. Kids will find this self-bailing sit-on-top big fun as a first boat or as a floating base for swimming and playing.

Cayman

SPECIFICATIONS			COLORS
Boat Length	12' 6"	3 m 75 cm	mango
Boat Width	29"	72.5 cm	kiwi
Depth	10"	25 cm	red
Weight	58 lbs	26 kg	yellow

Material	EXL™	EXL™	blue
			teal
			white
			black

STANDARD FEATURES: Bow access hatch with one piece Sure-seal molded rubber hatch cover, stern hatch, quick draining self-bailing scuppers, scupper plugs, deck loops and seat accessory loops, recessed storage area with gear straps, footbraces, drain plug, solo side carry handles, Easy Grip carry handles, molded-in graphics
OPTIONAL FEATURES: Integral rudder

Cayman

Our fastest cruising sit-on-top, the Cayman's strengths are its functional design and features. The Cayman has a wide beam and an efficient shallow arch midship that allows the boat to be stable while having a speedy feel that you don't get in most sit-on-tops. The upswept bow design keeps the boat from diving into choppy waves and swells in open water or in the surf zone. In cold weather or water the self-bailing scuppers can be plugged to reduce the flow of water into the boat. The scuba tank recess and optional rudder system top off this unique touring sit-on-top.

Grand Cayman

SPECIFICATIONS			COLORS
Boat Length	13' 10"	4 m 21 cm	mango
Boat Width	28.5"	72 cm	kiwi
Depth	11"	27 cm	red
Weight	60 lbs	27 kg	yellow
Paddler Wt. Range	< 450 lbs	< 204 kg	purple
Material	EXL™	EXL™	blue
			teal
			white
			black

STANDARD FEATURES: Bow and stern scuba tank hatch, quick draining self-bailing scuppers, scupper plugs, deck loops and seat accessory loops, recessed storage area with gear straps, footbraces, drain plug, Easy Grip carry handles, molded-in graphics
OPTIONAL FEATURES: Integral rudder

Grand Cayman

Finally, a tandem version of our solo touring sit-on-top. The Grand Cayman features a bow and stern scuba tank recess, and adjustable footbraces for both paddlers. A great family boat, the Grand Cayman is at home in the ocean or on your local pond. And its ultra-stable hull makes it a great fishing and diving/snorkeling platform. *(prototype shown)*

Sit-On-Tops make for great swimming platforms at any beach. Keeping access to valuables and gear is another perk for Jennifer Abbott as she relaxes off the western coast of Mexico.
