

WHEREVER THERE'S WATER

TEAM TESTED DESIGN PADDLER PROVEN

FROM THE MOUNTAINS TO THE SEA

HULL DESIGN INNOVATIONS

Perfecting the Green Boat hull required optimum rocker curve for speed. But this speed is lost if you must fight stability or can't place the boat where you want it to go. By careful reduction of rocker through the stern from the prototype, it's now more maneuverable with a greater top speed that doesn't squat when blasting down the river.

There's a lot that goes into every Dagger kayak design, not the least of which is living up to our heritage of innovative performance and quality. The truth is, most kayak companies make at least one great kayak, but what sets Dagger apart is offering best-in-class leaders that master every type of moving water from the mountains to the sea.

A truly great kayak design that gets people excited to paddle requires an understanding of the space between a drawing board sketch and a hull meeting the water. Our integrated R&D process ensures the final product meets both the standards of the design team and passes the

punishment of Team Dagger. This performance mindset inspires the entire line from whitewater to recreational and touring kayaks.

With a history of record-breaking first descents and a growing tower of competition trophies and medals, Team Tested approval doesn't come easy. We've got some scars to prove it. Most importantly, no design gets the Dagger stamp unless it's worth telling unforgettable stories about for years to come.

WHITEWATER KAYAKS

Whatever your skill level, and whatever the challenge, there's a Dagger Whitewater series that keeps up with your drive. From a renowned design and champion paddling team behind every model, it's no wonder that when records are broken or descents are achieved the first time, you'll usually find a Dagger. These are the top performing boats in freestyle, river running, or creeking, and the top performing boats in all those things you do that don't fit into a nice little category.

THE RELENTLESS PURSUIT OF PLAY

NO MATTER WHAT!

We’ve taken the “free” in freestyle to heart with the most dynamic playboat on the whitewater market today. When others are coming down, you’ll still be in the air pulling insane front flips, cartwheels, air screws, or moves that haven’t even been named. Relatively low volume and agile, the Agent surfs while other playboats sit on the sidelines.

The Dagger name stands for quality and performance, in our boats and our team athletes. That's why "Team D" plays such an important role for us on and off the water.

Their competitive leadership keeps our designs on the cutting edge, but it's their passion for getting more people involved in paddling and raising awareness that truly sets them apart. From countless fund-raising projects for important organizations and causes, to promoting paddling and environmental preservation around the world. Closer to home, you'll see them wherever the action is, ready to help everyone get the most out of their experience. Great companies are more than just great products, that's why we're proud of the people that wear the Dagger logo.

RECREATIONAL & TOURING KAYAKS

Inspired by the performance engineering of our whitewater kayaks, Dagger's recreational and touring kayaks take this control of the water to the wide-open possibilities of rivers, lakes, and sea. Comfort and stability design elements integrate fluidly with our desire to push the edges of aggressive performance. From day trips to multi-day adventures, take a kayak that does what you're capable of, not just what it is.

THE WIDE OPEN WATER'S CALLING YOU

LOSE THE CELL PHONE

This entry-level recreational kayak offers big time performance for exceptional value. For those looking for a great time on the flat or slow moving water, this boat delivers. It's easy to throw on top of a car, fun to maneuver, and paddles quickly. Go ahead, get out and hit the water.

RECREATIONAL & TOURING OUTFITTING

COMFORT FIT SYSTEM (CFS AND CFS-R)

The Comfort Fit System (CFS) combines the proven technical capabilities of whitewater outfitting with the comfort of a soft foam touring design. Now paddlers of all abilities can customize their kayak for a perfect fit based on their needs.

Features

- Large, ergonomic floating backband
- Quick release backband adjustment
- Soft foam seat padding
- Adjustable comfort control hip pads
- SlideLock foot braces
- Soft Touch handle

CFS-R SYSTEM

Our new CFS-R system is based on the performance-driven design of the famous CFS outfitting. It offers a height-adjustable backrest for versatility, along with a cockpit thighpad that can be easily swapped out for an add-on thighbrace.

ZONE® OUTFITTING

The Zone outfitting system is available on the Catalyst model and offers comfortable command of your kayak. Using intuitive fingertip adjustments, Zone lets you tailor your kayak for the ultimate fit, quickly, giving you an exceptional experience on the water.

Features

- Channeled and vented foam self-drains and conforms to the shape of your body
- Multiple backrest options can be adjusted with your fingertips and on the fly
- Soft Touch handle

SKEG

Dagger kayaks are designed for a range of paddlers, environments, and performance. That's why many of our recreational and touring kayaks feature a built-in drop skeg system that helps shatter the boundaries of traditional designs.

Our high-quality skeg adds minimal weight but brings major control on demand. A height-adjustable skeg maintains balance with the bow and stern to keep your kayak on course with the changes in environment.

Switch from an ultra-maneuverable kayak for moving water situations, to a straight-tracking, speedy boat with just one adjustment that you can make on the fly. Unlike a rudder, the skeg system is set in place and doesn't need to be periodically adjusted by your feet. Get in a kayak that can change its mind as much as you do.

ADVENTURE TECHNOLOGY®

BOAT SPECS
HOW WE GET THEM, WHAT THEY MEAN

WEIGHT
Based on a fully assembled boat including all outfitting. (NOTE: When comparing, other companies may not include outfitting in their weight specifications.)

CAPACITY
Field tests determine each model's capacity, with maximum being the greatest load the model can carry and still perform under typical conditions.

DIMENSIONS
Depths are measured from the highest point on the deck to the bottom of the hull directly under that point.

Prices shown are based on US Manufacturer's Suggested Retail Price and are subject to change.

Polyethylene expands and contracts with changes in temperature and humidity. Actual dimensions can vary from those shown in the Specifications Chart due to molding process and/or exposure to extreme hot or cold temperatures. Slight variations are not covered by warranty.

Specifications and features are subject to change.
