BOARDWORKS

WE LIVE WATER

Here at Boardworks we are passionate about all things to do with the ocean and water lifestyle we all embrace. Our goal is to share that passion, to promote respect for the planet, it's creatures and each other and to make surfing and stand up paddle more fun for more people.

Based in Carlsbad, California, Boardworks is proud to offer our line of innovative and award winning Stand Up Paddleboards, surfboards and accessories. The focus of Boardworks design has always been user-friendly products that make your time on the water more enjoyable. We realize there are many types of waterways in this world and many different ways to enjoy Stand Up Paddling and surfing. Our design approach ensures we have the right board for your next adventure. We are all avid surfers and paddlers, and you can be sure that all of our products have been tested and proven in their intended environment.

NEW FOR 2017:

New Construction Technologies:

- Brushed Carbon
- Vector Net
- Bombshell

New SUP Models:

- Rukus All Around / Surf
- Verve Race / Fitness

New Paddles:

- Traveler 3 Piece Paddle

New Accessories:

- Bravo SUP 4 Pump

UPGRADED FOR 2017:

Upgraded SUP Models:

- Eradicator Race / Fitness
- SHUBU Sport Inflatable
- SHUBU Inflatable
- SHUBU X Rocket Inflatable
- Muse Inflatable
- Raven Inflatable
- MCIT Inflatable
- Badfisher Inflatable

Boardworks offers a variety of board construction technologies to ensure that you have the right board under your feet. From brushed carbon race boards, functional touring boards, yoga and fitness, surf, fishing, inflatable travel, and all around rec boards, we have a board technology that fits your ability, your intended use and your budget.

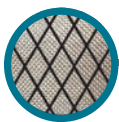

BRUSHED CARBON CONSTRUCTION | NEW

Boardworks high tech Brushed Carbon was developed for the need to keep stiffness in the board while keeping weight down. This construction results in a very light, responsive and flex-free hull.

BRUSHED CARBON CONSTRUCTION is used in Eradicator Race SUPs.

FEATURES:

- Low density stringer-less EPS core, CAD designed shape, machine cut and hand finished.
- Hand laminated with multiple layers of carbon and fiberglass cloths—all bound with the highest quality epoxy resin for a superior strength to weight ratio.
- Extra reinforcement laminate in the standing area.
- The hull is painted with a 3 part automotive paint that is partially sanded down to offer U/V protection while shaving paint weight.
- All components, fin boxes, finger-wells, leash and deck plugs are set in high density foam blocks.
- Self regulating vent plug to relieve pressure in heat and high altitude.

VECTOR NET CONSTRUCTION | NEW

Boardworks Vector Net was developed to create stiffness in the deck while retaining durability and reduced weight. This construction results in a very light, durable and responsive hull.

VECTOR NET CONSTRUCTION is used in Verve Race/Fitness SUPs.

FEATURES:

- Low density stringer-less EPS core, CAD designed shape, machine cut and hand finished.
- Carbon vector netting on the deck to reduce weight while creating tension across the deck for increased stiffness for power transfer and acceleration.
- Hand laminated with a blend of fiberglass cloths, carbon vector netting on deck—all bound with high quality epoxy resin for a superior strength to weight ratio.
- Extra reinforcement laminate in the standing area
- All components, fin boxes, finger-wells, leash and deck plugs are set in high density foam blocks.
- Self regulating vent plug to relieve pressure in heat and high altitude.

CARBON INNEGRA™ KRYPTO-FLEX CONSTRUCTION

Boardworks innovative high tech Carbon Innegra™ Krypto-Flex construction results in a durable and lightweight board with perfect flex and rebound characteristics for excellent performance and quick responsiveness.

KRYPTO-FLEX CONSTRUCTION is used in The Special Surf SUPs and Flying Pig surfboards.

FEATURES:

- Low density stringer-less EPS core, CAD designed shape, machine cut and hand finished.
- Hand laminated with a uniquely woven blend of carbon strand and Innegra™ fiber, carbon stringer tape, and fiberglass cloths—all bonded with high quality epoxy resin for a superior strength to weight ratio and flex characteristics similar to that of standard polyester boards with the added durability of Innegra.™
- 3 part automotive paint on deck with matte and/or gloss and polish finish.
- All components, fin boxes, finger-wells, leash and deck plugs set in high density foam blocks.
- Self regulating vent plug to relieve pressure in heat and high altitude.

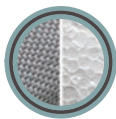

INNEGRA™ GLASS KYPTO-MAT CONSTRUCTION

Boardworks high tech Innegra™ Glass Krypto-Mat construction produces a very durable SUP with excellent impact resistance.

KRYPTO-MAT CONSTRUCTION is used in Tracker Fishing SUPs.

FEATURES:

- Low density stringer-less EPS core, CAD designed shape, machine cut and hand finished.
- Hand laminated with a unique blend of pure Innegra™ and fiberglass cloths and high quality epoxy resin for superior impact resistance and durability.
- 3 part automotive paint with matte and/or gloss and polish finish.
- All components, fin boxes, finger-wells, leash and deck plugs set in high density foam blocks.
- Self regulating vent plug to relieve pressure in heat and high altitude.

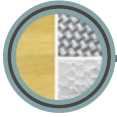

TEC (THERMAL EPOXY COMPRESSION) CONSTRUCTION

Utilizing this technology, where we apply both heat and pressure, coupled with the finest materials and epoxy resins, Boardworks produces molded sandwich boards that are light, tight, and very durable with amazing strength to weight ratio.

TEC CONSTRUCTION is used in the Super Sport Race/Fitness SUPs, Joy Ride All Around/Surf SUPs, Monkey Wrench surfboards, and Chisel surfboards.

FEATURES:

- Made in a precision compression mold created from a highly tuned mold plug.
- Low density, stringer-less CAD designed machine cut hand finished EPS core.
- Laminated with the finest epoxy resins and fiberglass cloth.
- High density materials in standing areas for added durability.
- All components, fin boxes, finger-wells, leash and deck plugs set in high density foam blocks.
- Self regulating vent plug in SUP models to relieve pressure in heat and high altitude.

TEC-V (THERMAL EPOXY COMPRESSION-VENEER) CONSTRUCTION

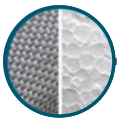

Utilizing this technology, where we apply both heat and pressure, coupled with the finest materials and epoxy resins, Boardworks produces a molded sandwich standup paddle board that is light, tight, and very durable.

Each TEC-V board starts with a precision shaped low-density EPS core, premium kiln dried bamboo veneer, layers of fiberglass cloth, and the finest epoxy resins. Our construction process results in SUPs with amazing strength to weight ratio.

TEC-V CONSTRUCTION is used in Great Bear Touring SUPs, Raven Touring SUPs, and Kraken Touring SUPs.

FEATURES:

- Made in a precision compression mold created from a highly tuned mold plug.
- Low density, stringer-less CAD designed machine cut hand finished EPS core.
- Laminated with the finest epoxy resins and fiberglass cloth and a high end kiln dried bamboo veneer sandwich layer.
- All components, fin boxes, finger-wells, leash and deck plugs set in high density foam blocks.
- Self regulating vent plug to relieve pressure in heat and high altitude.

EPX (EPOXY) CONSTRUCTION

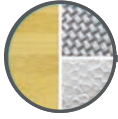

EPX is our standard hand finished epoxy board construction resulting in superior quality, and a very affordable board.

Starting with a CAD designed, low density, stringer-less hand-finished EPS core. Epoxy resin lamination and painted with superior automotive grade paint. Finishing off with a hand sanded or gloss polish finish.

EPX CONSTRUCTION is used in Muse All Around/Surf SUPs and Super Natural All Around/Surf SUPs.

FEATURES:

- Low density, CAD designed stringer-less machine cut and hand finished EPS core.
- Hand laminated with the finest epoxy resins and fiberglass cloth.
- All components, fin boxes, finger-wells, leash and deck plugs set in high density foam blocks.
- Self regulating vent plug to relieve pressure in heat and high altitude.

EPX-V (EPOXY-VENEER) CONSTRUCTION

Similar construction to our EPX build with the addition of a high density kiln dried bamboo veneer sheet. EPS core laminated with layers of fiberglass cloth, bamboo veneer with stunning graphics and automotive grade paint and polish. Some of our most attractive and popular boards are built in this construction. The Bamboo veneer adds both beauty and strength.

EPX-V CONSTRUCTION is used in Kraken All Around/Surf SUPs, Sirena All Around/Surf SUPs, and Joy Ride Flow All Around/Yoga SUPs.

FEATURES:

- Low density, CAD designed stringer-less machine cut and hand shaped EPS core.
- Hand laminated with the finest epoxy resins and fiberglass cloth and a high end kiln dried bamboo veneer sandwich layer.
- All components, fin boxes, finger-wells, leash and deck plugs set in high density foam blocks.
- Self regulating vent plug to relieve pressure in heat and high altitude.

POLY CONSTRUCTION

Boardworks POLY surfboards are built with the highest quality materials using traditional surfboard construction.

POLY CONSTRUCTION is used in Mini Mod surfboards, The Mix surfboards, and The Mod surfboards.

FEATURES:

- Stringered polyurethane core. Computer designed, machine shaped, hand finished.
- Deck lamination is wet out with polyester resin with a layer of 6oz and a layer of 4 oz with full rail lap.
- Bottom lamination is also wet out with polyester resin.
- Longboards and mid size models have a layer of 6 oz. and shortboards under 7' have a bottom layer of 4 oz., both with full rail lap.

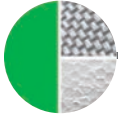

BOMBHELL CONSTRUCTION | NEW

Boardworks Bombshell construction consists of top and bottom dual thermoform sheets pressed over an EPS core with Kevlar and PVC reinforce rails resulting in a virtually indestructible, lightweight, very affordable SUP.

BOMBHELL CONSTRUCTION is used in Rukus All Around/Surf SUPs.

FEATURES:

- Durable & impact resistant ABS/polycarbonate thermoform dual-sheet on top and bottom.
- Lightweight EPS core with fiberglass cloth and epoxy resin lamination.
- Final assembly/lamination is completed in a precision compression mold.
- Kevlar and PVC reinforced rails for added impact resistance.
- Special foaming resin is applied to all cavities such as finboxes, deck plugs fingerwells for a water tight hull.
- Self regulating vent plug to relieve pressure in heat or high altitude.

SDK SOFTDECK CONSTRUCTION

Built better than your average soft board, Boardworks SDK construction results in a stiff, water-tight, durable board with better performance characteristics. What makes ours better? Most “foamies” are designed mainly to be inexpensive, without wood stringers and fiberglass laminations, resulting in floppy boards that quickly take on water and are not intended to last. The intention with our construction is to provide the safety of a foam board with the quality you expect from standard SUPs and surf hardboards.

SDK CONSTRUCTION is used in B Ray All Around/Surf SUPs, Squid All Around/Surf SUPs, and Froth! surfboards.

FEATURES:

- Full EVA wrapped deck and rails with an EVA traction pad inlays on SUP models.
- Forward deck plugs on SUPs.
- Slick Skin bottom on most models with an epoxy hard bottom on a select few.
- EPS foam core, with fiberglass epoxy resin laminations sealing the entire board.
- Dual wood stringers for stiffness and strength.
- Self regulating vent plug in SUP models to relieve pressure in heat and high altitude.

SINGLE CHAMBER INFLATABLE CONSTRUCTION

Boardworks stepped into the inflatable game early on utilizing the best manufacturing techniques and materials including CAD designs, sonic welding and/or high end German glues and the best Korean drop stitch material available on the market today. Available in various thicknesses and designs, Boardworks has the perfect inflatable stand up paddle board for you.

SINGLE CHAMBER INFLATABLE CONSTRUCTION is used in SHUBU Sport Inflatable SUPs, SHUBU 9'6 and 10'6 Inflatable SUPs, Shubu X Rocket Inflatable SUPs, Muse Inflatable SUPs and Raven Inflatable SUPs.

FEATURES:

- 1000 denier seam tape.
- EVA deckpad.
- 1000 denier PVC main sheet, deck and bottom.
- Multiple layer deck reinforcement and 410 denier base fabric.
- 500 denier composite yarn drop stitch.
- 1000 denier side rail sheet.
- Fin setups vary, AIR7 or standard slide-in center fin. Glue on rubber side fin or tri-fin options when applicable.
- Includes bag, fins, pump, patch kit.
- Inflates to 14-18 PSI.

MCIT (MULTI CHAMBER INFLATABLE TECHNOLOGY) CONSTRUCTION

Boardworks saw the need for a more rigid and stable inflatable stand up paddle board and created the Multi Camber Inflatable Technology.

Using a standing area made with a proven drop stitch yarn floor, and 500 denier PVC deck and bottom, coupled with tapered PVC side tubes, we have created a stand up paddle board that actually has “shape” in the rail profile. With this design we have created one of the most stable SUPs on the market as we can keep a low center of gravity using a 4"-5" standing area with a much larger outboard side rail diameter. This achieves incredible secondary stability. When the rail of the board tips from side to side the larger volume side rail is constantly coming back to a horizontal position.

MCIT CONSTRUCTION is used in MCIT 10'6 Inflatable SUPs and Badfisher Inflatable Fishing SUPs.

FEATURES:

- 1000 denier seam tape.
- EVA deckpad.
- 1000 denier PVC main sheet, deck and bottom.
- Multiple layer deck reinforcement and 410 denier base fabric.
- 500 denier composite yarn drop stitch.
- 1000 denier side rail sheet .
- 1000 denier low volume side tube.
- Fin setups vary, AIR7 or standard Slide-in center fin. Glue on rubber side fin or tri fin options when applicable.
- Includes bag, fins, pump, patch kit.
- Inflates to 14-18 PSI.

Versatility in flat-water and surf.

KRAKEN | 9'3, 9'9, 10'3 & 11'0

The Kraken SUPs are wide and stable all-around boards with excellent performance capabilities for surf and recreational paddling. These boards are a great choice for those looking for a cruising board with premium features that work exceptionally well in a wide variety of water conditions.

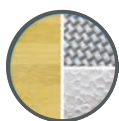

FEATURES & BENEFITS:

- Hull design that provides stability and smooth glide for recreational cruising.
- Pulled in tail with thinned, tuned rails for excellent surf performance.
- Beautiful bamboo veneer with unique nautical graphics.
- Soft diamond groove pad for comfort and traction.
- Tail kick and arch bar in tailpad for surf performance and tail turns.
- LiftSUP™ handle for easy portage and locking.
- Deck tie down plugs with bungee cord included for transporting gear on the 9'9, 10'3, and 11'0.
- Self regulating vent plug to relieve pressure in heat or high altitude.
- 4 + 1 fin set up in 9'3, 9'9, and 10'3 for multiple fin configurations for surf performance or tracking.
- 2 + 1 fin set up in 11'0 for surf performance and tracking.

SIRENA | 9'11 & 10'4

Beauty and Function—that is what the Sirena is all about. Perfect for all-around flat-water paddling or surf, these boards offer smooth easy glide and excellent maneuverability. They are light, easy to handle and a joy to paddle.

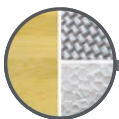

FEATURES & BENEFITS:

- Hull design that provides smooth, easy glide and great small wave surf performance.
- Wide tail for comfortable stability.
- Thinned out rails for maneuverability and surf performance.
- Beautiful real bamboo veneer with striking graphics.
- Deck tie down plugs with bungee cord included for transporting gear.
- Soft diamond groove pad for comfort and traction.
- LiftSUP™ handle for easy handling and locking.
- Self regulating vent plug to relieve pressure in heat or high altitude.
- 2 + 1 fin set up for good tracking, maneuverability and surf performance.

SQUID | 9'

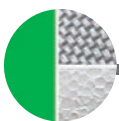

The Squid is the perfect introductory kids' SUP. It features scaled down dimensions for smaller paddlers and a deck plug up front for towing when kids get tired. It is soft on the top and rails for extra comfort, safety, and durability. Built better than your average soft SUP! Now offered as a package, the Squid comes complete with an adjustable paddle, leash and fin.

FEATURES & BENEFITS:

- Full EVA wrapped deck and rails with an EVA traction pad inlay.
- High density nose and tail EVA crash bumpers for safety and durability.
- Slick Skin bottom for glide and durability.
- EPS foam core, with fiberglass epoxy resin laminations, and dual wood stringers. (Fiberglass and epoxy laminations make it water-tight and strong, the wood stringers make it durable and stiff).
- Hull design that provides a comfortable ride with smooth easy glide and good surf performance.
- Self regulating vent plug to relieve pressure in heat or high altitude.
- Single dolphin fin enables better tracking and good surf performance.

ERADICATOR | 12'6" & 14' | UPGRADED

The Eradicator is an ultra-fast and versatile race SUP designed for elite and recreational racers alike. It excels in a variety of conditions from flat-water to ocean races, downwind, and in and out of the surf.

FEATURES & BENEFITS:

- Fairly flat rocker for speed.
- Flat bottom, V off the tail for easy water release.
- Filled in cockpit for easy foot movement.
- Increased volume in the foredeck allows the paddler to get further forward to allow more of the waterline to be engaged for speed in flat-water.
- The bow is dropped on the deck for clean bow penetration and shedding water in chop and bumpy surface conditions.
- The bow is tucked up underneath to increase the rocker for better surf performance.
- Wide point moved back for stability.
- Low entry rocker for excelling in flat-water.
- Fin placement forward for fast buoy turns and performance in the surf.
- Self regulating vent plug.
- Single tour/race fin for speed and tracking equipped with FCS Connect tool-less system for quick, hassle-free fin installation and removal.
- Ergonomic finger-well handle.

TRACKER | 11'

The Tracker is the ultimate fishing platform for paddlers of all sizes and abilities. At 11' long x 35" wide, this board is extremely stable for casting off the deck, landing fish moving around with ease.

FEATURES & BENEFITS:

- Deep double concave running throughout the bottom for great secondary stability, tracking and speed.
- Generous width for maximum stability.
- Low profile for better performance in windy conditions, i.e. remaining stationary when fishing and holding a course when traveling.
- Multiple Connex deck plugs for tying down extra gear or adding a variety of attachments to customize your craft. Bungee cords are included.
- Flat deck resulting in a level area to allow for easy foot movement and attaching coolers or gear boxes.
- LiftSUP™ handle for easy portage and locking.
- Single touring fin for tracking and speed.
- Self regulating vent plug to relieve pressure in heat or high altitude.
- Realtree™ camo accents.
- Extremely durable Krypto-Mat construction for impact protection.

SHUBU X ROCKET | 11'6" | UPGRADED

The SHUBU X Rocket is a great choice for those looking for a fast, stable, go-anywhere race trainer or fitness/touring SUP with premium features. Based off our Eradicator race boards, the X Rocket has a sleek outline with added width in the mid and tail section for extra stability.

FEATURES & BENEFITS:

- Complete upgraded package comes with Bravo 4 pump and rolling backpack for easy transport. See accessories page for more details.
- Fairly flat rocker and stealth outline for speed.
- Premium high-density 6" drop-stitch construction for maximum rigidity and better performance.
- Extra side handles for easy cross country portage.
- AIR7 fin box that is compatible with standard longboard fins and touring fins.
- Premium diamond groove pad with tail kick and arch bar for support and control when pivoting off the tail, and added surf performance.
- Deck tie down bungee system for gear.
- Inflates to 14-18 PSI.

MCIT | 10'6" | UPGRADED

Due to its unique design, the MCIT has proven itself as the most stable, rigid and versatile inflatable stand up paddleboard on the market. This is the perfect board for paddling in a variety of conditions from flat-water to whitewater, for people of all abilities.

FEATURES & BENEFITS:

- Complete upgraded package comes with Bravo 4 pump and rolling backpack for easy transport. See accessories page for more details.
- Tapered rails which enables it to be stable in the right spots and nimble in the tail for better performance.
- The rigid 4" drop-stitch deck sits below the rail height, lowering the paddlers center of gravity, resulting in excellent secondary stability.
- The I Beam Stiffening System significantly increases longitudinal rigidity.
- The tough cone bow adds extra impact protection for rocks, docks and other hard surface.
- Proven high-density drop stitch construction making the MCIT very rigid for better performance.
- Glued on rubber side bite fins and a detachable center fin allowing for versatility.
- Deck tie down bungee system for gear.
- Inflates to 14-18 PSI.

BADFISHER | 11'0" | UPGRADED

The Badfisher takes the proven stability and maneuverability of the MCIT and adds custom features that meet the needs of the growing population of SUP based fishermen. This is the ultimate adventure fishing platform to explore local waters or travel to places inaccessible to most fishing craft.

FEATURES & BENEFITS:

- Complete upgraded package comes with Bravo 4 pump and rolling backpack for easy transport. See accessories page for more details.
- The rigid drop-stitch deck sits below the rail height, lowering the paddlers center of gravity, resulting in increased width for stability while casting, fighting, and landing fish.
- The I Beam Stiffening System significantly increases longitudinal rigidity.
- Scotty Paddlesports attachment plates and a variety of D-rings for attaching crates and cooler.
- The tough cone bow adds extra impact protection for rocks, docks and other hard surface.
- Proven high-density drop stitch construction making the Badfisher very rigid for better performance.
- Equipped with glued on rubber side bite fins and a detachable center fin allowing for versatility and options when paddling in deep or shallow waters.
- Bungee system for strapping down gear.
- Inflates to 14-18 PSI.

CARBON RACE | 1 PIECE

A 100% carbon race paddle that is super lightweight with optimum stiffness and strength. The thinned out rectangular blade allows you to paddle closer to your board for efficiency with maximum power throughout your stroke. This podium proven race paddle is a great choice for touring and fitness paddlers as well.

FEATURES:

- Features ABS edge insert for durability.
- Carbon shaft, handle, and blade.

Blade: 8" wide, 77 square in.

Length: Up to 86"

Weight: 1 lb.

CARBON PERFORMANCE | 1 PIECE

Designed for smooth, clean, powerful strokes and easy transitions in the surf, the Carbon Performance paddles come in three blade sizes to fit a variety of paddlers. This is a great choice for those looking for a very light and stiff paddle for surf and all around paddling.

FEATURES:

- Dihedral face of the blade provides for straight strokes without paddle "wander."
- Molded carbon ergonomic handle makes this a very comfortable performance paddle.
- The ABS edge insert adds durability and keeps the edge of the blade intact.

Small Blade: 7.5" wide, 70 square in.

Length: Up to 86"

Weight: 1 lb.

Medium Blade: 8" wide, 75 square in.

Length: Up to 86"

Weight: 1 lb. 1.5 oz.

Large Blade: 8.5" wide, 80 square in.

Length: Up to 86"

Weight: 1 lb. 3 oz.

BAMBOO CARBON | 1 PIECE

A performance carbon paddle with the organic beauty of bamboo veneer. This paddle is perfect for surf and all around paddling, lightweight and durable with the perfect stiffness and strength.

FEATURES:

- Carbon shaft and handle with real bamboo veneer on blade.
- Dihedral face of the blade provides for straight strokes without paddle "wander."

Blade: 8.5" wide, 71 square in.

Length: Up to 86"

Weight: 1 lb. 6 oz

FGR (FLIP IT, GRIP IT, RIP IT) CARBON | ADJUSTABLE

"Flip It, Grip it, Rip It" - This paddle has earned its name because the Leverlock™ adjustment system makes changing your paddle length so fast and easy that you are ready to go in seconds. Extremely light, almost indestructible and very affordable, the FGR paddle is hard to beat.

FEATURES:

- Carbon CFRT™ [Continuous Fiber Reinforced Thermoplastic] blade, combining layers of carbon and thermoplastic for a superior strength to weight ratio.
- Leverlock™ adjustment system.
- Unidirectional carbon shaft and Leverlock™ tube.

Blade: 8" wide, 77 square in.

Range: 70"-86"

Weight: 1 lb. 4 oz

FEATURES:

- Fiberglass CFRT™ (Continuous Fiber Reinforced Thermoplastic) combining fiberglass and thermoplastic for a superior strength to weight ratio.
- Leverlock™ adjustment system for quick and effortless paddle length changes.
- Fiberglass shaft and Leverlock™ tube.

Blade: 8" wide, 77 square in.

Range: 70"-86"

Weight: 1 lb. 6 oz.

FIBERGLASS TRAVELER | 3 PIECE ADJUSTABLE | NEW

The Fiberglass Traveler Paddle breaks down into 3 pieces allowing you to pack it up and take it on any adventure. The effortless on-the-fly adjustment system allows for quick paddle length changes for all sizes of paddlers from kids to adults.

FEATURES:

- Strong and durable fiberglass shaft and blade.
- Flip-lock adjustment system for quick and easy paddle length changes.
- 3 piece collapsible design that breaks down to 36 3/4" long.
- Ergonomic Molded Carbon handle.

Blade: 8" wide, 77 square in.

Range: 42"-86"

Weight: 1 lb. 10 oz.

RAVEN, SIRENA & KRAKEN | ADJUSTABLE

Designed with striking graphics over beautiful bamboo veneer blades, these premium adjustable paddles are the most attractive on the market. Match these up with our most popular SUP models.

FEATURES:

- Carbon shaft and handle with a bamboo veneer blade with ABS edge insert for durability.
- Easy collar clamp adjustment system.
- Dihedral face of the blade provides for straight powerful strokes without paddle "wander."

Blade: 8.5" wide, 71 square in.

Range: 66.5"-92"

Weight: 1 lb. 12 oz.

ALUMINUM (PLASTIC) | ADJUSTABLE

This is our least expensive paddle—perfect for entry level paddlers and rental fleets due to its durability and ease of use.

FEATURES:

- Aluminum shaft and handle with a molded plastic blade.
- Collar clamp adjustment system for easy paddle length changes.

Blade: 8.25" wide, 78 square in.

Range: 68"-96"

Weight: 2 lbs. 5 oz.

FIBERGLASS (PLASTIC) | ADJUSTABLE

This paddle is perfect for entry level paddlers and rental fleets due to its durability, ease of use, and affordable price.

FEATURES:

TOUR-RACE SUP BAG

Boardworks offers the ultimate padded tour/race SUP board bags for protection and mobility, at an affordable price.

FEATURES:

- White nylon shell on the top.
- U/V reflecting nylon shell on the bottom.
- Sidewall for rail protection, thicker boards, and a great fit.
- 5mm padding.
- Padded shoulder strap.
- Handle webbing at nose and tail and mid rail.
- Zipper around tail for easy entry.
- Fin slot and finger well access with velcro closures.
- Built in ventilation patches on rails, nose and tail.
- Full, wide design to accept a wide range of touring and racing SUPs up to 32" wide and 7" thick .

Bag Sizes: 12'6, 14'

STANDARD SUP BAG

Boardworks Standard SUP board bags are excellent for travel and protecting your board from the elements.

FEATURES:

- White nylon shell on the top and bottom.
- 5mm padding.
- Padded shoulder strap.
- Handle webbing at nose and tail and mid rail.
- Zipper around tail for easy entry.
- Fin slot and finger well access with velcro closures.
- Built in ventilation patches.
- Full, wide design to accept standard SUPs of all sizes.

Bag Sizes: 10'0, 10'6, and 11'6

(All bags are 40" when flat to accept up to a 35" wide SUP).

6 PIECE SUP PAD

Features low profile compact EVA that offers added comfort and soaks in less water than most SUP pads, keeping your board lighter. Tail kick and arch pad to fit your back foot and give better leverage. 3M adhesive for industrial strength sticking power.

SURF & SUP LEASHES

Boardworks leashes are made of the highest quality materials and hardware.

FEATURES:

- Double swivels.
- Easy release padded cuffs (1 1/2" cuff for ankle and 2" wide for calf leashes).
- Triple Velcro wrap rail saver.
- Durable urethane cord (5/16" diameter on SUP leashes, 1/4" diameter for surf leashes).
- Overmolded leash ends for extra strength.

Surf Leash sizes: 6' Ankle, 7' Ankle, 9' Ankle

SUP Leashes sizes: 9' Ankle, 11' Ankle, 10' Coiled Calf

BADFISH RE-LEASH

Stand Up Paddle quick release leash. The Re-Leash is an elastic leash that connects the rider to the board and terminates at a "quick-draw". The link between leash and "quick-draw" is a snap shackle release devise that is activated with a tug on a small canopy ball. The Re-Leash can be attached to a PFD strap or anything near your hands by a carabiner, allowing for quick detachment.

Available sizes: 6' and coiled 11'

TAIL PADS

Boardworks offers 5 piece tail pads for surf and SUP in a variety of designs and colors. With the 5 piece pad you can spread out the pad to custom fit your board exactly how you like.

FEATURES:

- 5 piece adjustable design.
- Diamond grooved texture.
- 5 mm pad.
- 10 mm arch bar.
- 1 1/4" tail kick.
- 3 different color options.

SUP sizes: 16" wide x 17" long [3 color options].

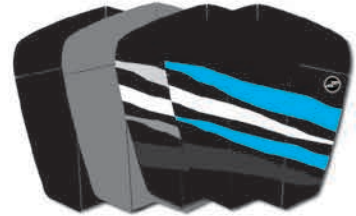

SURF sizes: 13 1/2" wide x 15" long [4 color options].

ROLLING TRAVEL BAG / BACKPACK

The convertible Rolling Travel Bag/Backpack is designed for serious travel with your inflatable stand up paddleboard, or any type of gear. Loaded with features, this bag makes hitting the road, airways or trail with your SUP, easy and comfortable.

FEATURES:

- Durable heavy canvas outer shell.
- Water resistant interior membrane.
- Urethane wheels set in durable plastic shell.
- Stowable padded backpack shoulder and waist straps.
- 1 large front pocket, 2 small side pockets.
- Side pocket that works as a paddle holder.
- Sidewall cinch straps.
- Interior cinch straps.
- Top, side and bottom carry handles.
- ID tag/business card sleeve.

Standing height: 41" Width: 16" Depth: 12"

BRAVO SUP 4 PUMP | **NEW**

The all new SUP 4 pump is an exceptional high volume, high pressure, double action floor pump for inflatable SUPs. It can be used in double action mode during the first phase of low pressure inflation. The pump can then be manually switched to single-action mode during the last phase of high pressure inflation.

FEATURES:

- Improved ergonomic handle with integrated pressure gauge.
- Dual action low/high pressure settings for easy inflation.
- Max Pressure 29 psi.
- Extra durable inflation hose.
- Nylon carry bag.

BRAVO 12 VOLT INFLATABLE SUP PUMP

The Bravo BP electric, high pressure, inflatable SUP pump is the perfect solution for quickly inflating your SUP board. Hook it up to a 12 volt battery and it inflates up to 15 psi air pressure.

FEATURES:

- 9 foot long battery cables and 6 foot air hose.
- Eight valve adapters, links up to most common valves.
- Pump, cables and hose fit in a handy zipper carry case, with shoulder strap.

REPLACEMENT FINS

Boardworks offers replacement fins to fit a wide variety of SUPs and surfboards. Please refer to boardworkssurf.com for more information and details.

CHILL STATION COOLERS

Boardworks offers 2 sizes of coolers designed for use on Stand Up Paddleboards, and of course, all types of other uses. The Chill Station coolers are an affordable alternative to high priced, high end coolers, while having similar design features. Strap the Chill Station to your paddleboard behind the standing area and use it as a seat for paddling from a seated position, landing fish, dealing with tackle, or just chilling out and taking it all in!

FEATURES:

- Thick roto-molded plastic inner and outer shell for maximum durability.
- Environmental LLDPE material, food grade, non-toxic, UV resistant.
- Injected with interior foam for superior insulation.
- Heavy duty rubber latch straps.
- Rubber anti-slip feet.
- Side carry handles with slots for attaching to deck or floor.
- Large plastic drain plug with rubber o-ring.
- EVA pad on lid for comfort and non slip.
- Can be drilled into for adding a variety of mounts.

Dimensions 28 liter:

Outside: Length: 21.5" Depth: 12.5" Height: 13.25"
Inside: Length: 17" Depth: 8.75" Height: 10.25"

Dimensions 38 liter:

Outside: Length: 24" Depth: 13" Height: 14.75"
Inside: Length: 19" Depth: 9.5" Height: 11.5"

BOARDFISHER SAFARI PACK

The Boardfisher Safari pack is designed to appeal to the hard core fisherman as well as the flat-water paddler for everyday outings, great for exploring, camping, day trips and fishing.

FEATURES:

- 3 custom fishing rod holders (vertical, outrigger and fly rod).
- Ample exterior pockets, and a large unobstructed interior to hold most anything.
- 4 tie down straps and 4 peel and stick low profile anchors for boards without tie down points. These anchors are heavy duty and designed to not interfere with surfing or paddling.

BOARDFISHER SUP TIE DOWN KIT

Includes 4 tie down straps, 4 peel and stick adhesive deck anchors and low profile peel and stick anchor system that will not interfere with paddling or surfing when Safari pack is removed.

RAIL AND PADDLE GUARD

Boardworks rail guard extends the life of your rails and keeps your board looking like new. This package includes two 3" x 72" rail tape sections and a 1" x 48" paddle guard section that is easy to install, invisible, low profile, and doesn't change the performance of your paddle. Waterproof and clear, this is the best rail and paddle guard available.

CONNEX ACCESSORIES WITH WATERPROOF CASE

This waterproof case will attach to a Connex plug in the deck of your board. It contains an array of Connex accessories to customize your craft.

FEATURES:

- Pelican 1040 Micro Case.
- 2 leash cups.
- 2 1/4-20 brass inserts.
- 2 GoPro mounts with screws.
- Hex key for changing out inserts.
- Webbing strap with Velcro loops and 1/4-20 low profile bolt to attach box to board, (board must be equipped with Connex insert).
- 4 stick on feet to stabilize box and allow water to run underneath.

CONNEX FLOATING ACCESSORIES SET

FEATURES:

- Floating tube with molded loop lid.
- 2 leash cups.
- 2 1/4-20 brass inserts.
- 2 GoPro mounts with screws.
- Hex key for changing out inserts.

BOARDWORKS

WE LIVE WATER

Welcome to Boardworks Surf 2017. Our surfboard line is designed to enhance your fun and maximize your time in the water. Make your next wave your best wave with one of our many versatile performance shapes.

THE MIX | 7'0, 7'6, 8'0

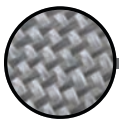

Designed and tested in southern California, the Boardworks Mix is a modern round tail, mid-size surf sled that is a great option for all types and sizes of surf! With a full outline, a good amount of foam, progressive rocker, and tri fin setup, The Mix is a great board for those looking for a larger step up option, or longboarder's looking to increase maneuverability and decrease swing weight. Get into the mix and make your next wave your best wave.

FEATURES:

- Foam-rich foil and bottom shape with slight concave running from a single forward to double out the tail.
- A full round tail for fluid turns and plenty of lift in the tail.
- Full nose for extra flotation.
- Tri fin set up complements the full round tail.
- Traditional Poly surfboard construction.

- Croc skin texture for traction and comfort.
- EPS foam core wrapped in fiberglass epoxy resin laminations.
- Dual wood stringers for stiffness and strength.
- Slick skin bottom for speed and glide.
- Designed with a modern mid-longboard template to excel in a variety of conditions.
- Removable through-bolt fin system.

SURF

SDK SOFTDECK CONSTRUCTION

2 Color Options:

smurf

slime

Built better than your average soft board! Boardworks SDK Softdeck construction results in water-tight, extremely durable boards.
