WHERE
INNOVATION
MEETS
ADVENTURE

Wilderness Systems

Kayaks
& Accessories

There's a place in your imagination where you
Water is everywhere. You move gracefully here,
completely integrated that your presence goes
by native creatures, which provides you the rare
of seeing things as they are when people aren't around.
you get it on film, or angle for some dinner, or just
at all in while the shell you wear to endure
genetic world cracks and flakes away. Whatever. Your
is for coming here are your own. If only you could
this dream into reality. Relax, you're halfway there.
We have directions.
In this catalog you'll find a collection of kayaks
expressed in design, performance and innovation. For
ing, for sport or for general recreation, each one
the highest standards in materials and craftsmanship.
The result is a kayak perfectly suited to your needs; a
made to transport you where your imagination
already been.
Stay as long as you like.

Wilderness Systems' vice president and co-founder John Sheppard heads our multi-national team of kayak designers. The genius he and his team brings to the table is reflected in the variety of innovative kayaks for every paddler at every skill level. That's what brilliant design is all about. But you're part of the process too. Comments, observations, photos, even criticisms from our customers are valued here.

Free and open communication is a big reason we've been able to continually improve our products. We also believe it helped us win Canoe & Kayak Magazine's 1995 Manufacturer of the Year Award. So keep writing. And we'll keep setting new standards of excellence.

**Cover Photo: Steven Cook
Crystal River, Florida.**

Once common in the rivers, canals and bays of Florida, manatee populations are dwindling. Due to diminished habitat, pollution and, most seriously, encounters with motor boats. These slow-moving, gentle mammals must frequently surface for air, exposing them to run-ins with power boat props. It's rare to find a Florida manatee that doesn't bear old scars or fresh wounds.

Even though man poses the greatest threat to manatees, these friendly animals seem to tolerate our company. While big boats and noisy motors stress the animals, paddlers are routinely rewarded with close-up, extended encounters. Perhaps it's the manatee's way of saying thank you.

We urge you to respect manatees, their habitat and their right to unharrassed life. Better still, contribute to the Save the Manatee Foundation, 500 N. Maitland Avenue, Winter Park, FL 32789 (407) 539-0990. Your tax-deductible donation will help preserve a bright future for these remarkable animals.

RO TOMOLD Touring

HARRY TIEKEN
Nova Scotia

Harry's sleek 500-
pound Greenland skin
captured his youthful
spirit and never let go.
He grew up in Holland among
fishermen; Dutch navy vet-
erans; and a climate with sea's
unpredictable power. Sea
obsession, and that child-
hood memory, affects all
his designs.

Our rotomolded kayaks begin
with a recyclable linear polyethylene
resin. With the addition of heat
and a unique rotational molding
process the powder undergoes a
morphosis into a smooth,
durable, and lightweight
kayak ready to be outfit-
ted. Rotomolding allows us to more
efficiently produce our innovative,
recreational and performance
kayaks, as well as to maximize
durability. It also enables us to pro-
duce the longest lasting and most
comfortable touring kayaks available.

SEALUTION II XS™

Designers:
Harrie Tiekens/Wilderness Systems

Every family needs a no-nonsense kayak. The XS™ is it. Don't let the name fool you though. The Sealution II XS is perfectly packaged to accommodate the needs of a wide range of paddler sizes and skill levels. So if you're looking to leaving the office early for spontaneous paddling trips, the XS™ is the one when you are.

SEALUTION II™

Designers:
Harrie Tiekens/Wilderness Systems

Hitting the high water marks for stability, durability and comfort, the Sealution II™ never met a day that an extended expedition it didn't like. It's the rotomolded standard you'll find on the oceans and estuaries around the world. It's easy to spot. Look for the paddlers who are smiling.

SEALUTION II XS™

Designers:
Harrie Tiekens/Wilderness Systems

The standard's bigger brother. The name implies, the XL™ gives you a roomier cockpit, more storage space and increased stability. Larger paddlers and those with a lot of gear will find the XL™ fits like it was made for them.

RO TOMOLD Touring

ANDY SINGER
New York

... that performance
... always mean
... Each design an
... built from the
... up to reflect his art
... background, naval
... nature knowledge
... personal taste. Seeks
... himself with
... the result pleases a
... audience.

Designer: Andy Singer

...er adults and kids who find the
...ect of maneuvering a conventional
...ng kayak daunting should try the
...lo™. This thoughtful design offers
...ability and performance of a touring
...y, with the predictable response of a
...er, more manageable craft.

PICCOLO™

Paddling doesn't discriminate. It's for everyone; big, small, young, old, timid, aggressive. At Wilderness Systems we celebrate the differences with a vast line of kayaks to fit virtually every body type, skill level and personality. We've been outfitting the world's most demanding paddlers for more than a decade. We're confident we can outfit you.

SEACRET™

Designer: Wilderness Systems

In kayaking, as in life, confidence is everything. Novices and those looking to try more challenging water can gain confidence in a Seacret™. A wide cockpit provides the stability you need to learn new techniques while enjoying the speed. Seacret's surprising speed and airy, roomy cockpit defines comfort. Whether suited for easy rivers as well as more turbulent water, the Seacret™ is out!

SEA-TWO™

Designers: Harrie Tiekens/Wilderness Systems

Sharing the experience can be the reward in kayaking. Reason enough to paddle a Sea-Two™. With its foot-controlled rudder system, comfortable cockpit and outstanding tracking, the Sea-Two equalizes any imbalances between paddlers of different aptitudes. It's ideal for families with kids.

COMPOSITE

Touring

MARK ROGERS
Wisconsin

Erstwhile unhappy mechanical engineer. Now a happy kayak builder. Student of Inuit designs. Studied under the legendary Ulstrup. Passionately replicates traditional boat designs; and serves the craft through workshops and classes.

Our reputation was built on making composite kayaks. So we take their production very seriously. Each one gets our undivided, maniacal, obsessive fixation on every painstaking step until we've produced a boat you'll be tempted to frame and display on a wall. Of course its real beauty emerges when you get it in the water. Sleek, silky smooth, incredible strength-to-weight ratio. Choose from fiberglass, Kevlar® or fiberglass/Kevlar® combos.

SEALUTION™

Designer: Harrie Tiekens

Our first design, and still our most popular, the Sealution's legendary status was built on performance characteristics to suit paddlers of every skill level: excellent tracking, satisfying hull speed, predictable stability and maneuverability (even without the optional rudder). This craft holds a place in our hearts, and in the hearts of thousands of paddlers worldwide.

SEALUTION XL™

Designer: Harrie Tiekens

The Sealution XL™ is the big brother in the Sealution™ family. Its longer length and greater volume give it the capacity to carry just about anyone, with anything, any where without compromising performance. The XL™ provides the high standard of performance paddlers have come to expect from members of the Sealution™ family.

ARCTIC HAWK™

Designer: Mark Rogers

There's a 5,000-year-old pedigree in this classic Greenland design. From the full-length shallow "V" bottom to the flared sides, the Arctic Hawk™ replicates the architecture of its Eskimo ancestry. Boat designs will forever come and go but when superior performance is required this timeless classic has no equal.

SPARROW HAWK™

Designer: Mark Rogers

Nearly as fast and maneuverable as the Arctic Hawk™, the smaller and lighter Sparrow Hawk™ was designed to give a very personal fit for small to medium sized paddlers. Whichever Hawk is right for you, you'll marvel at their graceful flight.

COMPOSITE SS MODELS

Sealution SS™, Sealution XLSS™, Arctic Hawk SS™, Sparrow Hawk SS™, Tchaika SS™, Shenai SS™ and Echo SS™

Some people believe "the lighter, the better". It is for these performance oriented paddlers that we make our SS models. By eliminating the bulkheads and hatches from many of our popular composite models we can offer the lightest touring kayak available. All SS models come with supplemental flotation for added safety. For the ultimate in weight savings order your SS in a Kevlar® layup.

TCHAIKA™

Designer: Andy Singer

Paddling a boat that is too big can be an intimidating and even frustrating experience. The Tchaika™ was designed to level the playing field, giving smaller paddlers (up to 165 lbs.) the control and responsiveness they need to fully enjoy every facet of kayak touring.

POQUITO™

Designer: Andy Singer

Little people, stand up! Then sit down in this kayak designed from bow to stern just for you. Scaled down to meet the needs of the youngest explorers, the Poquito™ was designed to grant independence and inspire confidence.

SHENAI™

Designer: Andy Singer

There will always be those who take paddling more seriously than most. We make the Shenai™ for them. Knowledgeable paddlers can extract remarkable performance from this craft, even in unfriendly conditions. Knifing through waves, cutting the wind, moving effortlessly. Every response immediate and predictable. For experienced paddlers the Shenai™ is the ultimate experience.

ECHO™

Designer: Andy Singer

Pleasingly stable despite its narrow beam, the swift and efficient Echo™ paddles like a single and doesn't weigh much more. This sleek design is ideal for pairs who don't require a lot of storage capacity and the speedy profile also lets you cover more water in less time and with less effort.

SKOOKUMCHUCK™

Designer: Lee Moyer

Skookumchuck™ is almost as fun to say as it is to paddle. At 21 feet this streamlined masterpiece is the choice for extended expeditions over long, open-water passages. Generous cockpit spacing allows complete paddling independence and smooth carry between strokes, even for out-of-sync paddlers. Guide services worldwide pay the Skookumchuck™ the ultimate compliment: they swear by it!

RO TOM OLD

Sportsman & Recreational

RASCAL™

Owner: Joe Walton

Measuring in at just under ten feet in length, the all-new Rascal™ offers some distinct advantages. It's perfect for younger sportsmen just starting out and older ones who prefer a solid, stable feel on the water. The Rascal™ is light, easily maneuverable, maneuvers on a dime and is capable of going where bulkier boats can't. With that kind of versatility this member of our family is going to make a big splash.

Ron Johnson and grandson: Crystal River, FL

We craft our sportsman and recreational boats with the same innovation, workmanship and eye on performance that's made our legendary sea kayaks... well, legendary. We just make these boats a little wider in the hips, for extra room and stability. Longer and wider cockpit openings for easy entry and exit and go unnoticed by families loading extra gear or a smaller paddler. Whether you're an angler, hunter, birder or photographer, young or not-so-young, there's a big world out there waiting for you. Our sportsman and recreational boats can get you there and home again, with stories to tell.

PAMLICO™

Designer: John Sheppard

The rugged original. You can paddle a river or lake and never find one swifter, more maneuverable or tougher than the Pamlico™. The roomy cockpit makes entry and exit a breeze. Go tandem and take a weekend's worth of gear or go solo and take a weekend's worth of gear with you left over to bring home your catch. Durable and portable, a Pamlico™ is on every outdoorsman's cartop.

PAMLICO EXCEL™

Designer: John Sheppard

All of the qualities of our original Pamlico, but more of them. Adjustable/removable seats for solo or tandem paddling. Ample storage aft keeps your gear out of the weather. This boat will make you wonder why you ever wanted a canoe. The removable cockpit gives you the option to bring a little one

COMPOSITE Sportsman & Recreational

CHESAPEAKE™

Designer: John Sheppard

Hunters, anglers and birders can navigate
lakes and rivers with confidence in the roomy
interior of the Chesapeake™. Thanks to
its wide beam, this reliable craft per-
forms especially well for hunters and
fishermen who require a lot of gear. Even
when fully loaded the Chesapeake™ tracks and
turns nimbly with little effort.

Constructed of fiberglass or Kevlar® and
available in lightweight clear skin coat or
matte gel coat finish, the Chesapeake™
is a trophy in itself.

Frank Hubbard and friend

JOHN SHEPPARD
North Carolina

Wilderness Systems' co-founder and principal. Thrill seeker who found kayaking because rock climbing is too risky in a downpour. MFG/R&D is his specialty. Preferred designs feed his fringe mentality; believes speed is a good thing. He heads the multitiered Wilderness Systems design team including Rick Jones and Joe Walton

Joanna Brown: Alligator River

PAMLICO LITE™

Designer: John Sheppard

The cousin to our popular Pamlico boat, the Pamlico Lite™ cuts through some swath wherever it goes. It has the same roomy cockpit and adjustable seats as its relative, but is sleek and light enough for easy portage. The Pamlico Lite™ is an exceptional boat for the recreational and sports paddler.

Sit-On-Top

OTOMOLD

Note: Backrests optional on all Sit On Tops

THE RIDE™

Designer: Joe Walton

After we tested this new member of the Wilderness Systems family and exclaimed "what a ride!", naming it was a cinch. The Ride™ combines pure sit-on-top touring fun with ample storage, comforting stability, easy portability and nimble performance. Campers, anglers, birders and snorkelers take note: This is The Ride™ of your life.

John Sheppard: Surfing a Riot, Outer Banks NC

RIOT™

Designer:
Andy Singer

Another new addition to our family, the Riot™ is almost one-third as wide as it is long, for the kind of stability wave-riders crave. A unique bow design gives it surprising agility. The roomy perch with optional padded seat/backrest lets you play in total comfort and a molded compartment keeps a small cooler or your Pelican case™ in easy reach. Climb aboard a Riot™ and make some noise.

TWOCAN™

Designer:
Andy Singer

Imagine a kayak with a rumble seat and you'll have a Two-Can™. Sleek and modern in appearance this solo sit-on-top kayak has a uniquely sculpted deck. The low deck has a center seat for solo use or as a bow and stern seat suitable for a youngster, a favorite pet, or extra gear. You can with the Two-Can™. (Capacity approximately 200 lbs.)

Accessories

1 MINI SKIRT At last a product designed to offer you protection from sun, spray and paddle drip without totally sealing off your cockpit.

2 NO SLIP SKIRT Our deluxe touring skirt with an extra feature, a rubberized strip of material sewn on where the skirt meets the cockpit rim to insure a "no slip" grip.

3 BASIC SPRAYSKIRT Made from durable coated nylon pack cloth this skirt comes with an adjustable bungee both at the waist and around the cockpit. Large grab loop for easy removal. (sizes: standard, "Rascal" (fits Rascal, Tchaika, Poquito), and Chesapeake.)

4 DELUXE TOURING SKIRT Our most popular skirt, this coated nylon skirt has shaped seams, suspenders, a large grab loop, front tunnel pocket and a safety whistle. (sizes: standard and Sealution XL)

5 NEOPRENE NYLON COMBO SKIRT The perfect marriage between a neoprene and a nylon skirt. The neoprene base provides a tight fit while the nylon tunnel allows for complete adjustability. (sizes: standard and small. (to fit the Sparrow Hawk and Arctic Hawk cockpit.)

6 COCKPIT COVER COMBO BAG A cockpit cover with a built in mesh storage bag. The perfect place to store PFDs, neoprene booties or other wet items. (sizes: small, large.)

7 COCKPIT COVER This rugged nylon cover is essential in keeping undesirable elements out of your kayak. (sizes: small, large, Sealution XL Chesapeake and Pamlico.)

8 THIGH STRAPS Adjustable 1 1/2 inch straps with large rubberized pads create increased stability and boat control.

9 PAMLICO MINI SKIRT Provides the same protection as our regular Mini Skirt only sized to fit our Pamlico and Pamlico Lite models. Center section slides forward for solo use.

For years of paddling we've experimented with a lot of accessories. Some we liked, some we didn't, and a few we swear by. Here are the accessories we swear by we recommend here with our strongest endorsement. When you build some of the world's finest kayaks, you want accessories that measure up.

10 PAMLICO SPRAYSKIRT The two halves of this three hole nylon skirt join together with a 1 1/2 inch wide Velcro strip. The spray deck is supported by three adjustable polyethylene bows that aid in the shedding of water.

11 BILGE PUMP Considered by most touring paddlers as a standard safety item, our heavy duty American made Beckson pump is capable of pumping 8 gallons of water a minute.

12. CARTOP KAYAK CARRIER Made especially for transporting kayaks. Includes straps and hardware.

13 RESCUE BAGS (sizes: small, large.)

14 LIFE JACKET Available in hunter green for sportsmen or high visibility yellow. (sizes: medium, large, extra large.)

15 LUMBAR SUPPORT Incredibly simple but functional, this nylon covered tube allows you to locate extra support where you need it. Comes with nylon tether.

16 MESH STUFF SACK W/SHOULDER STRAPS (sizes: medium, large.)

17 NYLON MESH DUFFEL (sizes: medium large, extra large.)

18 SIT-ON-TOP SEAT This padded and fully adjustable seat pad and backrest increases comfort and support in any sit-on-top kayak.

19 BREAKDOWN YOUTH PADDLE (sizes: 165cm, 180cm.)

20 BREAKDOWN RECREATIONAL/TOURING PADDLE (sizes: 220cm, 230cm, 240cm)

21 PADDLE FLOAT This dual chamber float is an essential for touring kayakers.

22 NON-STORAGE FLOTATION BAG Coated nylon flotation bag with three grommets to secure inside of kayak bow or stern.

23 PELICAN CASE Dry box.

24 DECK BAG W/MAP CASE

25 DECK BAG W/WATER BOTTLE

26 WILDERNESS SYSTEMS SEA KAYAK WAVE TEE SHIRT The famous wave is available on a high quality screen printed t-shirt. Available in long or short sleeve. (sizes: medium, large, extra large.)

AT WILDERNESS SYSTEMS WE WORK AND PLAY WITH ECOLOGICAL SENSITIVITY FOR ONE VERY SIMPLE REASON:
THE AIR WE BREATHE, THE LANDS WE INHABIT, THE WATER WE EXPLORE MEAN THE WORLD TO US.
