2018 LINEUP

THE UNDISPUTED LEADER IN PREMIUM FISHING KAYAKS

Wilderness Systems fishing kayaks are the leader in kayak fishing, and introduced the world to now-standard features and platforms, such as SlideTrax™ and stand-and-cast designs. Now with an offering for every kind of angler, Helix propulsion technologies, a remarkable heritage of easy-to-paddle crafts, and the strongest fishing team in the world, Wilderness Systems remains the must-have brand for serious kayak anglers looking to achieve greatness on the water.

A.T.A.K.

The A.T.A.K. strikes the balance between speed and stability with its long waterline, walkable surface, and wind-shedding hull. The open deck is optimized for customization and storage including the Flex Pod or motor power with Helix MD™ Motor Drive. Comfort is unsurpassed with AirPro MAX high/low seat and the boat can be upgraded with the AirPro 3D for elevated perch position and casting height.

PRO STAFF RIGGING *Mike Baker – New England*

The A.T.A.K. 140 is my go-to kayak while guiding clients, fishing tournaments or embarking on solo missions for striped bass here in New England waters. The Thrive Baitwell is a must-have while using live mackerel as bait. Rod Leashes are important to ensure your rods stay in the kayak in case of rough waters. I always keep a Custom Dry Bag on board with first aid kit. To rig up my various electronics, the Flex Pod OS is hard to beat!

RADAR

The Radar offers **paddle**, **power** or **pedal** capabilities, and features S.M.A.R.T. Hull Technology for ultimate performance in multiple water environments. The Radar boasts state-of-the-art outfitting including SlideTrax™ rails, a multitude of storage opportunities, and the ability to equip Helix MD™ Motor Drive, the Helix PD™ Pedal Drive and multiple electronics options. The ultra-comfortable AirPro MAX seat complements the package with optimized positioning for any mode of travel.

PRO STAFF RIGGING *Shane Williams – Southeast*

I have my Radar 135 rigged specifically for tournament bass fishing. The Helix PD plays a vital role in helping me navigate larger bodies of water and in keeping my hands free to fish. I use my Stern Mounting Plate to hold my shallow water anchor system so I can hold my place to fish an area more effectively. My Kayak Crate houses all the lures and terminal tackle I'll need for the day while my Mesh Storage Sleeve keeps tools right on the back of my seat.

TARPON X

Go anywhere and catch anything in the Tarpon 130X. Building upon the heritage of the Tarpon series, the Tarpon 130X maintains a sleek, speedy, and exceptionally stable platform with abundant features for storage, electronics and propulsion opportunities with Helix MD™ Motor Drive. The AirPro LITE seat features a slide-on-track system for increased fore/aft trimming.

revered Tarpon series, the Tarpon 130X such as the versatile Flex Pod OS, allowing compatibility. The supremely comfortable

PRO STAFF RIGGING

Juan Veruete – Northeast

I've rigged my Tarpon 130X for hunting trophy smallmouth bass on rivers large and small in the northeast. Every river smallmouth angler has a handful of "go to" baits for their home flows, and I always keep mine within easy reach in my Mesh Storage Sleeves. Water temperatures and structure are a primary driver of river smallmouth activity levels and location in big deep rivers, and the Flex Pod OS Electronics Kit helps me make quick work of installing my sonar unit and power source in my Flex Pod OS.

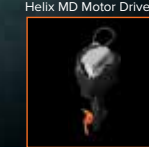

THRESHER

Built with the all-water angler in mind, the Thresher's efficient hull satisfies the need to paddle long distances and is complemented by voluminous rails that provide stability for breaching waves or fighting fish. The sleek deck accessibility, and features several cutting-edge advancements including the Flex Pod OS and consolidating fish finder electronics.

paddle long distances and is complemented by is optimized for maximum storage, capacity and removable console for Helix MD™ compatibility

PRO STAFF RIGGING

Josh Brightman – West Coast

I've got my Thresher set up for catching yellowtail off the coast of Southern California. I have to deal with some pretty big surf launches and the Custom Dry Bag holds everything that I need to stay dry and fits perfectly in the Bow Hatch. My Rod Leashes and Retractable Tethers also make sure all my gear on deck stays put during those big launches. A sure way to catch yellowtail is with live bait; the Thrive Baitwell easily allows me to hold enough bait for a full day of fishing.

PROPULSION TECHNOLOGIES

The power of Wilderness Systems is on full display with the proprietary Helix Propulsion Technologies.

Featuring a 6:1 gear ratio precision-tuned to a 14 x 17 two-bladed fixed pitch prop, the Helix PD is the most efficient and intuitive pedal system ever engineered. Fully deployed, the system is forward-reverse capable and optimized for maximum speed in exchange for less effort so you can be hands-free to fish all day. A groundbreaking auto-raising mast achieves zero draft with a spring-loaded kick pedal, and the unit can be further stowed forward and out of the way to complete the 3-phases of possible positioning. Tuned to the proven performance of Wilderness Systems' S.M.A.R.T. Hull designs, and equipped with a versatile steering system, the Helix PD Pedal Drive is the definitive advantage.

Partnering with the proven technology of Torqeedo, the Helix MD Motor Drive takes you farther, faster with top speeds reaching up to 6 mph at a range of around 20 miles, and featuring a lithium battery that lasts up to 8 hours. The Helix MD is lightweight at only 15lbs, and comes equipped with an intelligent remote throttle that displays your GPS-calculated speed, remaining range and battery runtime. Fully variable forward/reverse functionality allows you to set the throttle to the speed you want so you can be hands-free. Quiet, low-maintenance, and easy to integrate and use in compatible Wilderness Systems kayak models, the Helix MD is an all-access pass for kayakers of all ages.

All Wilderness Systems kayaks are designed and manufactured in the U.S.A. Colors may vary slightly from those shown in catalog. Color combinations (Desert Camo, Mango Orange, Midnight Blue, Solar Yellow, and Sonar Green) will vary from those shown in catalog and are unique for each boat we produce. Variations in color are not covered by warranty.

Polyethylene expands and contracts with changes in temperature and humidity. Actual dimensions can vary from those shown in the Specifications Chart due to molding process and/or exposure to extreme hot or cold temperatures. Slight variations are not covered by warranty.

Specifications and features are subject to change.
